

411th Knowledge Seekers Workshop; December 16, 2021 (Key Phrases Completed (31 pp) ; Key Words (19 pp); Transcription; Quick Index all completed: ready to be translated to Portuguese and PP for Friday teaching)

Main theme: Netanyahu & Trump used photos of KF reactors to make sanctions on Iran - never checked the validity, Now IAEA has a problem because they accepted it - So everybody is trying deny and cover up their crimes.

Plasmatic M fields carry RNA information and emotions of the soul which needs to be transported in order to manifest physicality at point of destination; First time this knowledge has been released to man; Feel the color and emotion of plasma; birthday of Mitra is the Day of Enlightenment of humanity; 21st of December maturity of the man; 5plus1 negotiations about to fail need support of KS; IAEA has visited Linz secretly

Quick Index:

Plasmatic M fields have an RNA/DNA structure like in physical life; It's an unknown science to man; M fields carry field forces for positioning that gives structure to physical life; M fields carry memory of where it comes from & will go; This knowledge is needed for transportation and transmutation (T&T); M field RNA is needed to put plasma back together at point of arrival; In T&T there is no DNA of physicality; In deep space travel the emotion of the STM will be T&T through the emotion of the RNA; Plasmatic field flow lines can be seen; The emotion of the soul of the entity will be transported; This is how we will replicate man in any dimension (D) in the Universe (U); With this knowledge mankind becomes a true man of space - not trapped in UFOs; Space colors are created out of the interaction of entities in space; Emotions are shown by colors - like Gans; We have to learn the essence of the fields of the emotions - without physicality; Understanding the field strength of the emotion of the plasma; This is why other magnets move when one is added; See it Gans's pull each other - does energy of Gans bend?; What do the emotions of CuO and CH₃ bring; We'll train ourselves to color of Gans's like night vision glasses; This is all part of the RNA and information carrying part of the plasma - unknown until today; Races who know this will see emotion of the Creator - requires a purity; Not far when you become detached; responsible to understand "double loading" of the STM's fields - and soul of emotion of man's fields on same track; Field lines carry emotion of every cell of body; In T&T if the information of the emotion of the soul doesn't arrive - you have a man with no emotion though the STM exists within it;

21st December Mitra will manifest; Mitra manifested in physicality millions of years ago; Time of Mitra means man will understand full process of creation - same for all creatures; Many of you will understand through the T&T systems; Star of David made through the STM; Everyone will see the light on the 21st December; All the Gans's in a container can decide to give their energy to a single Gans; Corona mayhem - we can decide if we want to stay in D of physicality; How to create emptiness to receive the fields of the U; The burden of understanding the knowledge is upon you; Birthday of Mitra is the Day of Enlightenment of the man; Teaching today is for deep thinkers -

complete it by interacting with the fields in oneself; 1 minute teaching needs 1 thousand years of understanding; Feeling the emotions of the colors; Emotions at the level of STM not physicality; Emotion of physicality has attachment-detachment-expectation; Emotions of the soul have no expectations; Unconditional giving; Metal plates in lower body - should still be able to use Vertical EU; 40 EU for Arizona (AZ) built with 4 different characteristics for different jobs; EU are set for different applications; We absorb energies mostly through our fingers;

Mr. Keshe tells experiences with 5plus1 negotiations - egos of big nations wasting energy with demands; Negotiations in rough times need lot of support from KS U Council; Time for purging & punishment over - tome of maturity & understanding; Document given - Iran will share T in exchange for peace if 5plus1 fails; Nations have to share T and commit to permanent peace; Share full plasma preparation at 100% purity for space travel; 80% of American and European demands on Iran have nothing to do with nuclear industry - can't share electricity with neighbors; Iranians want bank accounts filled; Ancient time races could retract and extend arms; Knowledge is hidden within us - we block it; Third Eye - is the STM; Disheartening message from IAEA; Israelis use UN Cameras to identify workers and recruit them as spies - bribing etc; Suggests that cameras put only on the machines - not on staff; Chinese can identify anybody in 10 minutes; President of Brazil against vaccine passport because he had personal bad experience; World leaders exempt from vaccination; Satan is made by the man for the man; Leaders think they are above everything until they become part of it; Netanyahu used KF space reactors in presentations falsely claiming Iran was making nuclear bomb; Then he joined with Trump to put sanctions on Iran; Created fear and false sanctions against Iran - many suffered and children died by sanctions; The truth and documents have been given to IAEA and they want to cover it up because they went along with the sanctions without having proof; IAEA and Americans want to cover it up; Negotiations are about to fail; Watch what happens to these leaders who do bad things - live horrible lives; Example of Saddam who would take brides on wedding night - he had to hide in rat hole; Tribe of Moses will cease to exist by end of century - people will understand truth and walk away; Same with Vatican and all religions; IAEA visited KF Exhibition Center like thieves in the night; European & American scientists allowed to investigate KF T in Linz during pandemic; The catalyst is the new T - wait till after 21st December; Persian Empire learned not to cross their borders - other kings willingly submitted to be part of ; Americans don't want to admit they were fooled. Back to negotiations.

KEY WORDS:

**We keep on expanding - deeper understanding of creation - what is about to happen
Biggest problem in T&T - not carrying the whole information in the energy package
Like in physical life - RNA/DNA - the plasmatic M fields have the same
It's unknown to man -in time as man comes to understand it - will understand
M fields carry field forces for positioning that gives structure of physicality
M Fields also carry the memory of what it is -where it comes from- where will go
M field memory of the field themselves - is an unknown science to humanity**

It's something that we never knew about - we never even considered
In time - when we start transporting and transmuting - we'll need to know this
When we send the physicality (out somewhere) - where is its memory?
What is it going to be at the end of (the travel - when it arrives at the destination?)
We understand the information part RNA - & physical part DNA - for T&T
In the VEU - we can transmute the physicality - in D of fields of an atom
When you re-manifest - how to keep the cell of liver - in the liver and not in brain
The part of the plasmatic field that carries information - unknown to humanity
We will teach you about the RNA of the M fields
We'll teach you how to transport & transmute - carry it across the span of U
When you arrive - you'll be able to put the plasma back together to be a human
With the fields you carry the emotion and understanding of the structure
You carry it in a way - that the cell knows it's for reproduction or whatever
For example, it knows in this atmosphere there is no air, - so no need for me
In this atmosphere there is no liquid - do I need to adapt (myself)?
Shall I show myself, or do I become part of the memory bank of the plasma (PI)
I stay in memory bank - till PI travels to another D where there is liquid
(I am needed) to be able to survive in liquid environment
RNA in the knowledge of M fields is hidden -but very apparent -once we understand
We call it line of order - or line of communication within structure of body
This is vital for us to understand - that when we land on a planet
In this planet there is no need for an arm or leg
Understanding of the emotion of the plasmas - will decide what shape best fits
(By comparing) how other life forms managed to exist in this environment
(Discovering) what I need to have to exist here
I go back to the memory as a cell of the physicality
In the RNA of the information
Because there is no DNA of physicality
And I say, "I need a system," to survive to absorb the energy of this planet
This position in time and space - in this galaxy
The RNA of the M fields in sacrosanct in understanding the T&T in deep space
We cannot send the emotions through the telephone lines
Our emotion can be misread on telephone - sadness mistaken for happiness
In the D of the plasma technology - the emotions cannot be misread
In deep space travel you use the emotions of the STM - not the physicality
Emotions of the RNA of the T&T will behave like M - stronger in confirmation
Plasmatic field flow lines of RNA can be seen - emotions carried with entity
The fields carry a load to the point of destination - interact - create new position
RNA of the M fields - last stage of understanding the process of creation
When man understands how to carry the emotion of the soul of the entity
Then the soul in T&T of the fields - will bring RNA and manifest physicality
Humanity has got a lot to learn, humanity has a lot to understand
When I take you from A to B - I carry your emotion and manifest you in different D
At the beginning - mankind surely will fail 99 out of 100 times of trying
But if you understand RNA & information carrying part of M field - will succeed
Otherwise - like many races - you'll take refuge in UFOs - in D of physicality

There are races who have achieved the "Holy Grail" of creation
They can T&T the emotions of the soul & information about existence & emotion
Then you can replicate the man in any dimension (D) in the U.
Replicate man - with the same emotions - understanding - and feelings
But it might not (manifest) the same (way) at the point of arrival
Mankind is about to become a true man of space
When he understands transmutation/conversion of information of emotions of STM
Biggest problem - understanding the strength of fields of the emotions
We see electrical (impulses) in brain where joy & sadness - but signals don't exist
The (emotions) cannot be transmuted and replicated, if man does not understand.
Man must understand the plasma of existence, and PI of the source
In the coming time, the transmutation systems - will carry this D
Means man will see the soul & emotions - understand them - international language
In the past teachings - I touched on this a few times in a very soft way.
The color of interaction with entities in space - will tell you their emotion
Space colors will be created out of interaction between you and the entity
The red, blues, and greens are not the ones we see - the way we are used to.
We have seen these plasmatic colors with Gans's - sometimes - never understood
Are the colors you see - the same ones I see? my eyes create slightly different
Does red mean danger - or the saving of life
Why is CH3 orange, and your other H's - all in the same color bandwidth?
Isn't that the essence of the creation of the fields - "I want to give to you"
When we are space passengers and see these colors - means a source of energy
What happens when you see the D of the Gans's of the lead?
If we see in depth of space - does it mean that object wants to take from us
Mankind has to learn in space - which emotions manifest which colors
When you get angry you grow red.
Does it mean you are feeling the emotion in the D of physicality?
You have to learn the essence of the fields of the emotion - without the physicality
There is a common interaction of the fields in the U - (emotions are) the same
A given color, feature, and life - means "I am in need" - I am not stealing
Another colors means - "I want to give" - I have so much - I'm part of Creator
Do you tap into it?
I have this field strength and I am ready to take - what do you want back
How can I give you from the essence of my creation?
What will you give me - to stay within the boundary of the existence?
Biggest mystery to man is understanding field strength of the emotion of the PI
Now you understand why the magnets move when you add one to them
The other magnets move - because I am here to give what you don't have
We haven't created the T to see the field interactions and colors between magnets
When you put the magnet on the table and it attracts the other ones.
What does it mean, did you see the emotion of the fields before they interact.
We call it North and South Pole - Entry and Exit
But how does that entry takes place, what is the emotion transfer between them.
How many of you have created Gans's and tried to see if Gans's pull each other.
How many of you have tried to see if the energy of the Gans's bend?

What colors do you get by putting one Gans in with another - in replication (cup)
We are not trained - we do not understand
What emotions do the CuO and CH₃ bring?
(Does it matter) who made them or how they were made?
Were they made with the joy and happiness - is the soul of the Gans is a happy soul.
What happens when it adds its energy to the field of the water in the bucket?
(Maybe) the color of this water - means it's not good for me?
But now you pick any cup, put Gans in it - and drink the plasma water
But you haven't looked at the color of the emotion of the Gans.
You have not learned the knowledge of T&T -of this field -what it does in your body
At the moment, we are at the early stages, and we see some results and we follow it.
We will train ourselves to see the color of Gans's - like with night vision glasses
It might be a color, which is good for you - but not good for me.
I don't drink it - and hope it will become good for me.
This is all part of the RNA and information carrying part of the Pl.
This knowledge has been unknown to man until today
The races who understand and conquer this - will be able to see emotion of Creator
Blessed are the soul who get the elevation to be able to see these colors
A few races in the depth of space have managed to reach this purity
It's not far when you become detached.
It's not far when you become detached from emotions of physicality
Emotionally you get excited, your heartbeat goes up.
What happens when emotionally, the plasma of the STM gets excited?
Would it change his color, .. emotion, .. his position
Would it reposition you to have a constant emotion of physicality
(Emotion of physicality) denies you from observing its real true emotion.
The emotion of the STM - will carry the correct information for manifestation
Before mankind had no knowledge - now you are responsible to find its source
You are responsible to understand how to double load the STM's fields
And the soul of the emotion of the man's fields - on the same track
Then the field lines carry the emotion of every cell of the body of the man.
Otherwise you'll have a man with no emotion, even though the STM exists within it.
(This happens when) the info of the emotion of the soul - never arrives
And you have what we call - the "cabbage" of the soul
(You have a physicality) - waiting for the info of the emotion of the soul to arrive
(In the mean time) you can blindly follow using the system -until you understand
The purpose of the teaching is for man to understand the knowledge
True man of space-understands every motion-emotion-transmutation of every entity
Otherwise - we have to carry your physicality in UFOs
When you stick to physicality - then you have entrapped the soul in it.
The spaceships of the STM - is within the STM
And not within the physical spaceship of the man.
Understanding the knowledge and T, is part of the T&T of the life.
Part of the existence of the true life within the space.
Man will understand that every creature is the same
Every fields of the soul of the creation is the same

But (when it manifests) - then it changes in the D of the physicality
"I have created man in the image of Myself."
Not in the D of physicality -
But in the D of the fields of the souls and the emotions of the fields of the souls.
(It's) the information which (it) carries within.
But man is so feeble that he thinks the Creator has 2 arms, 2 legs, and 2 eyes.
I gave you the eye to see - but in the D of the STM
I gave you the field strength to observe, to understand the emotion of the seeing
And not to physically to see.
Man will mature to understand the process of creation - not the way he have chosen
One day we'll become mature enough to reach the M field information
Some of the children of Adam- the Creator - will come to understand
21st of December is approaching - you are waiting to see manifestation of Mitra
Mitra has manifested itself in the D of physicality millions of years ago.
But in the D of the physicality of the soul - not in D of physicality of the man.
The time of Mitra - means man will understand full process of creation
Not only for man, but for the rest of the creatures of the U.
It's the birth of the totality in understanding the love of the Creator for its created.
Many of you will endeavor to understand the process of creation -
Through understanding the process of created.
If mankind is to achieve knowledge of creation - walk away from D physicality
But if mankind is to achieve through knowledge of creation, mankind has to walk
away from what he understood about the D of physicality and life of the man
"I made man in the image of Myself."
In the D of the STP - and the D of his soul of the created - and the STM itself.
Maybe one day mankind will understand the process of the creation
Understand the true essence of it - and not the dream of it.
What will happen
The way it will happen
And the way mankind will decide for it to happen to itself.
Many of you will understand true process of creation through T&T systems
When we transport you from one EU to another - not by physicality anymore
We have made teleportation
T&T of both the fields of the PI of creation and the emotion of the plasma
In a way - the RNA of the RNA
We are carrying the information of the existence
Plus carrying the information of what it needs to exist -
At the point of manifestation, or detection.
At the moment - it's only important for you to see the UFO - the rest later
We leave it to our next generation to sort it out
Because we have seen and we believe in what we see.
You want to see a miracle - because you believe that will lead you to understand
By seeing the light you might possibly see the light of the Creator
You (think) if you see the light of the confirmation of existence
This shall show your power - and what you can deliver.
I have shown UFOs or shooting stars to a number of KS

I never created the shooting star.
I created the fields of the emotion of the soul
That the STP of the man, reads the emotion and calls it, "a shooting star."
We have made it possible that for 3 to 5 souls to see it at the same time
We have the knowledge of the common denominator field strength of observation
(We can make) the whole of humanity to see the same light at the same time
It doesn't matter where you are - even underground - you will see the light
Even if you all see the light - will that light enlighten you to knowledge of creation
Whether you all will get enlightened - is questionable
Even man in the deepest caves will see the shooting star
Because we have created that impression through the STM - not physicality
In a way - we have put you in a state of dream, and we control the show.
Many of you KS will come to understand the teachings of the past and the fields
Would all the Gans's within the same pot, decide one Gans should be elevated -
And they all give their energy to that single Gans.
Would the shape and the emotion of that single Gans -
In the D of physicality be the same, now that it has received all these energies.
Today I have opened the rigma (rigmarole) of the life.
How you can unravel this rigma
It's your level of understanding about the true level of creation.
How far you go as KS - will be the biggest battle for every single one of you
We have seen the Corona and the mayhem, which will come with it in the future.
The strength of the emotion within you - will decide -
If I want to be in this D - to be given, to be enforced to be given
To be conditioned for my physicality to live, to be here
To accept, the "to what can come to harm my physicality."
In that process - through realignment of fields of emotion of physicality & STM
And understanding the interaction with the STP - you shall decide
If you are taking fields of the energy from the U with all the carrier info part -
Or only the fields of energy
Then what do I have to give to create the emptiness (to receive that part)
Humanity has entered the point of what we call, "creation."
The true essence of creation, the true understanding of the process of creation.

Maybe some of you KS will reach the point you don't have to seek any further
You understand the process and see the light of the emotion & RNA of your soul
At that point you are mature to see the light of the Creator,
And with it - become part of (it),
As you have seen - to become part of,
Because by seeing you have accepted to receive the totality of the knowledge
Of the RNA and DNA, both with information and physicality,
Of the existence from the source, from the point of creation.
The true essence of this comes - as we are approaching what we call, Christmas.
We all speak about the shining star, the Star of David.
Is that star, a true star?
Or was it seen by the souls and accepted by the sum of the totality of the physical life

Of those who wanted to believe seeing the star.
Did the star carry the same emotion & info in every person who saw it?
Or was it just only for those who followed the path of Christianity?
Now the question of existence takes different shape.
Is the Star of David the light through interaction of the emotion of the fields,
Of those who wanted to see interaction and emotion of the fields of the Creator
All within the structure of their own soul
The burden of knowledge,
The burden of learning the knowledge,
The burden of understanding the knowledge,
Is upon you,
To understand the process of creation of the information and emotion of the STM,
That with it -you can create essence of the source of communication,
And emotion of your physicality,
In any dominion, and position in the U, in the Unicoise.
Then you understand how, we have lived amongst men for thousands of years
As we understood the transformation and balance of the energy of the STM
I hope many of you KS will mature to this point very fast.
The birthday of Mitra in coming days - is the enlightenment of the man.
It is the birth cycle of the creation
As Mitra is amongst us, has been, and shall be -
In the essence of the confirmation of the STM - not the STP of the man.
Those of you who want to see Mitra with your own eyes
Will see the light of it on the 21st.
Those of you - expecting to see the physical D of the birth will have a lot to learn,
As you have to convert D of the physicality from the source,
From the top - then humanity in one instance will mature.
The teaching of today is not for faint hearted,
The teaching of today is for those who are deep thinkers -
Those who understood the process of the teachings of past years -
And can manage to convert it, and complete it,
With interaction of the fields of the man himself.

Before when we taught in physical D of reactors - we needed 3 to 5 hours
Now that we teach in the essence of understanding - only one minute is needed
But that 1 minute teaching - needs thousands of years of understanding.
It's for you to decide if you have matured enough to understand part of it -
Or the totality of it -
As you have learned to walk - now you have to explore the ground.
The teaching of today - took many, many thousands of years of contemplation

Questions

Q: Are the colors of the emotions of the RNA and the soul - ability to see color?

K- It's the emotion of the color. It's a feeling rather than physical representation

Q: So why did you call it a color?

K- Because that's how you understand it.

How else do you want me to call it? .. The human race has not managed to complete, that kind of wording for the color of emotion

Q: Will different souls as they develop this ability to see emotions - will some see it, feel or hear it? Will each soul will learn to sense it in a different manner, according to their own makeup?

K- Not really - I have explained this before in a teaching before, you can go over it. Now we have to learn the same emotion - but at the level of the STM.

There is no difference, but in understanding,

You are living with a different, approach, more or less to the same thing.

We have to learn what different emotions mean in different universes

Emotion of the soul is similar, but in different ways, than the emotion of physicality.

Usually emotion of physicality has Attachment - detachment - and expectation

Where emotions in the D of the soul - there is no expectation.

You see when you love someone, you expect to be loved back.

In D of creation or the soul - the love you give, you don't expect to be given back.

But you know you receive it back from somewhere, not necessarily from the lover,

That gives you the emotion to give more.

It's very hard to fall in love with the D of the soul, because it is a one track lane.

Q; I have a titanium plate in my left hand, can I use the Visual EU without problems. What advantages does the VEU have for my brain?

K- VEU is setup for a specific characteristics, and specific jobs.

As it's in the lower part of body - It should not be effected with it at all

What you can do - depends what is wrong with your brain, that you expect it to fix.

But these are a special systems built for a specific purpose.

Even the Body EU are not all the same.

We build them according to what we want them to do.

The 48 units for AZ are built of 4 different characteristics - for different jobs.

We develop them according to what job they are going to do.

Your condition might require you to sit in different combinations of EU

We'll train doctors how to use which combinations for what purpose

For example if you have a stroke or leg damage you don't need VEU

The systems are setup for different applications.

Q: As we have 1 M hand and 1 G hand, would it be possible to absorb the energy of the U with the G hand, and transfer that energy with the M hand, if it is possible, please teach us?

K- We already do it. We absorb 80% of our energies from the environment,

Most of the energy is absorbed through our fingers.

When one hand is attraction and other repulsion - create friction and light

In ancient time man could do this - today man has lost that capability.

Hold your hands in specific way - bring together conflict of fields - create light

We've shown this, it can be done, it is very easy, but it takes a lot of energy.
But you can tap into the universal energy fields, with the position of your fingers,
And just receive that energy and create that light.
But that light energy is not necessarily in the vision of the man,
It's in the essence of the energy of the STM, you will see the light through the soul
First practice you'll do when you become aware of how to use your soul
You see with the eye of the soul - not the physical eye - see light but nothing there
(When this happens) then you understand you reaching that point of maturity
Biggest problem with humanity - only accepts if it visual sense or one of 5 senses
Mankind has to learn to transfer this - into the emotion of the soul,
Then you'll see different lights -different understanding - feel different emotions,
But you will still see - to confirm the existence.
Yesterday I was in 5plus1 negotiations group.
It's amazing how much energy is wasted there.
You see how much waste, sitting there, just to satisfy the ego.
After a few minutes of it, you just want to walk away
It's not there to support humanity. It is there to support the ego of the few leaders.
When you walk out of it - you feel you've been in a chamber for 20 years
The energy depletion is amazing.
It's the only way to do it though - to be physically being present and doing things.
At the moment we are involved in so many different directions and works
Somehow the energy comes, somehow you manage, (1:26).
(This is to inform) the KS - U Council supporter - negotiations are in a rough time
There's little light here and there, but overall we need a lot of support
What I see from close quarters - it's going to fail.
Because the ego's of leaders - bigger than what can be delivered by one or the other
It drains you to see how collaboratively people are sent to destroy each other.
It's interesting - how collectively they agree to do the same
Unnecessary demands suddenly pops out
Because "we don't want to do - you accept or we change something else"
It's the responsibility of all of us - to change the soul of the leaders and negotiators.
We need a lot of support.
I don't get disheartened - but I see the next step, the next stage -
What can be done and how people walk away, or create a condition -
for others to walk away, to confirm that they have won, or are doing something.
We have seen some positive results, but we still, there a long way to go.
It can literally fail. We'll see after Friday or Sunday, how it will take shape further.
But there are some small breakthroughs, but we'll see.
We need a lot of support from all the KS

Q: The prophets of the past, despite offering good news, warned of difficult times, and apparently we are already in an era of limitations for human civilization. If we don't align with the ethos of the U, and we don't get a peace treaty between the nations, can we enter into an era of cataclysms on earth, as a purge and correction of the course of human civilization?

K- The time of purging is finished. (It's) the time of maturity and understanding.

KF submitted a dossier to the negotiators - It's very simple.
I read from one of the pages - one day it will be published.
It says, "Iran will share collectively, and develop new T with all nations.
If agreement for sharing this new T is not reached with Iran on this basis in Vienna
Iran sees as its right to share the new space ?? and the space defense T -
with any nation as it reaches its goal of, T in exchange for permanent peace."
This is a problem for leaders of leading nations - to commit to permanent peace
We are very clear - we are not there to put conditions on the sharing of T
We are giving it freely to the nations if we don't reach 5plus1 agreements.
For them it is hard to accept, that they have to share T,
Because then they loose the superiority.
In another paragraph of the material - it says, Iran puts no condition for sharing
and collaboration in sharing this new T and knowledge, with 5plus1 and other
nations, to produce pure plasma nuclear material for space energy and defense.
Our message from Iran is clear, the Iranian nation and leadership
Is prepared to share openly with 5plus1, the full plasma preparation,
Which means we produce nuclear materials at a 100% rate.
They cannot believe Iran is prepared to share such a technology (T)
When we wrote this document the condition was, that we share openly.
It's hard for our leading nations to accept,
That they have to become equal with the other nations in knowledge and T.
This is the hardest thing, which I see, and it's totally unbelievable
How some of the world leaders, and people who like to keep the superiority,
Do not want to sign themselves to peace. (1:34).
What is going to happen, what is about to happen, what is there to happen,
In the D of physicality, what I call, bribery of the largest scale,
All sorts of contracts - if we go along with what they want.
80% of American demands on Iran have nothing to do with nuclear industry
80% of American government demands in the 5plus1 negotiations
It's the same with the Europeans - has nothing to do with nuclear industry.
Major demand of Biden - Iran does not supply electricity to Iraq or Afghanistan
This is unheard of. When we hear this in negotiations we just pull our hair.
Iran supports other nations - it's neighbors with electricity - they say cannot do
This has nothing to do with nuclear industry - it's not what we are there for
We have to oblige in order to get the sanctions removed.
(They are saying) if you want to help your own nation - don't help your neighbors.
How come France has agreed to help Europe?
If the British Oil falls short of energy, they tap into French energy system
Because French with nuclear power, guarantee supply. The same with the Germans.
But if Iran does it - it's a criminal offense and they have to be sanctioned for it
Sometimes when I look at the negotiators - I just cry.
What the heck are we here for?
We just give and give, for what? - (to be told) - not to do
We want to share the T, we are sharing everything.
They say, "No, you cannot share, because the others will be equal to us."
It's an amazing construction of hypocrisy in ?? - and a lot of other things.

It's not only the Americans,
It's mostly from the Iranians - who say.
"Give us this, give us that, we'll do this - this is my bank account, that's yours"
Little achievements, but in general totally tying up a nations not to do anything.
What does helping your neighbors with energy supply -
Got to do with negotiations on nuclear power, or what they call nuclear weapons

Q: What is the fastest way to converge the STP with the soul of the nonphysical part of our being. What is the secret key?

K- Die (they laugh ..) It was a funny answer to it, but it's understanding the trust I mean that's the answer for the human being - today.

But we call it sacrifice - or martyrdom - all sorts of names put to it.

But in reality it's to understand the work and the connection

In ancient time, there were races who could retract their fingers and extend them.

They could retract and extend their arms when they needed.

For saving - not taking what you need from an environment - or for protection

Of course they had control over the emotion of the STP.

We all can do that, it is not hidden from us. We just ignore the access to it.

We just have created a blockage - so that we don't hear.

For example living near a church - you eventually stop hearing the bell

Your STP and physicality have decided, " I am ignoring it"

But accidentally you hear the lunch "ding dong" - It's the same.

We have decided, not to listen to the "ding dong" of our soul.

Now we want to wake up, but there is a lot of clogged information in-between

We need to dust, to be able to get at it - and then we'll see (again)

It's not - that it is not there.

We have created these barriers for not to hear it. Not to confirm its existence.

Unless you find a ladder to the Creator, in a different way, or to your soul.

In Vienna they put a ladder on top of the main church in the center

The steps to the Creator, how far you can go with it -we listen to it every night.

From the church you can find your way into the depth of the U - to the Creator,

But not when they give you a physical ladder.

It's us who have created those steps on the ladder - for ourselves over time.

We made this ladder bigger and longer with more steps.

When you go the full length of the ladder,

It's twisted and you come back to the same point - where you started from

It's a funny way, because you don't see the end of the ladder

You don't see, that the end - actually comes back to you.

It's us who makes it longer or shorter, according to our beliefs and understanding

It's like the camel rides on Tenerife

You think you are going for a long ride - but it's only 2 minutes

We have denied the knowledge to ourselves,

We have denied the affirmation of the existence and communication to ourselves

Q: In the spiritual world many people talk about opening up the Third Eye, the pineal gland, Could you shed some light how to open our Third Eye?

**K- Isn't the pineal gland another way of saying - get access to your soul?
We don't hide - duck and dive - we just go directly for it (we tell it straight)
Isn't the Third Eye your soul, but you become aware of totality, your creator
In different time, different generations, and different intellectual understanding,
The same thing has been explained in different ways,
So people could think, understand it, and follow it.
Now with the teaching of the KF there is no ambiguity
It's there and you can find out - where you try to hide it.
Why do you need a Third Eye when you have access to your soul?
If you look at the position of what they call the gland, and
Look at where we tell you, your soul is at. It's not very far off, is it?
Because people couldn't understand the STM is within the structure of the man.
So now it becomes the pineal gland, the Third eye or whatever.
If you manage to get access to your soul you can call it anything you like.
We are enlightening you to understand - to find it yourself.
Mankind has not been kind to himself, and denied himself many, many things.
The negotiations will go till Sunday night, and then we'll see.
Most probably people will return back to their countries for holidays
They'll come back after Christmas - if they come back.
There is a very high possibility, that they might break up.
These negotiations are very much one-sided gun policy, shotgun policy, I call it.
And the Iranians are not helping it much.
We still need a lot of support, it needs a lot of understanding,
One of the problems is that the sanctions are very complex (network)
But our Iranian diplomats are not very seasoned diplomats.
They are not mature in negotiations - that's a problem with the Iranian team
The Americans are sitting in London - not in Austria,
Both the European and British teams are extremely seasoned.
They understand how to play.
The Europeans and Americans play with seasoned diplomats.
Iran doesn't have that.
New Iranian government - using relatives as negotiators to fill bank accounts
It's a very dirty game - extremely dirty game.
I call it - European version of Birth of Mitra - We choose 3 or 4 days difference**

Q: Is it best to try to receive the fields at dawn when the birds are singing?

**K- Would you like to be onboard a plane - have dawn all the time, 24 hours a day
In space man will find places where fields gather - to absorb the tastes of the fields
In the RNA memory bank of the M field - "this tastes like a banana on earth"
Whether it will raise the same emotion in the D of the soul - Is a different matter.**

Q: Someone asked, is there a ritual for "giving from my soul?"

K- No we never create these kind of things.

You've got to go within yourself to find it

There is no shortcut - till you understand it

Q: It means we have reached the point of maturity of our soul if we can do it.

K- Yes, more or less .

The situation with the negotiations is not easy at the moment.

How can we reach the soul of these people, how can we enlighten them?

I just received a message from IAEA, which is disheartening.

We have no answer. In just past few minutes. How do we work, how do we see?

How do we break up these barriers?

The people we put to lead are themselves- lead by others,

To the confirmation of their own lack of existence.

Q: Will a deal by the UN atomic watchdog, on replacing the cameras help?

K- We have a big problem in Iran - a very big problem.

This is part of the discussion, do we accept, and replace the cameras?

This is the discussion, that the Russians have brokered.

What it is and what I raised. You got to understand. We see things in different ways.

It's a big concern for Iran. I have risen that in the discussions

Israelis are using the UN cameras to identify our people, pressurize, and sabotage.

We have a big problem with UN cameras.

UN cameras are positioned inside all sensitive areas,

Supposedly to watch, that Iran doesn't do anything.

But the Israelis, which IAEA directly feeds all the videos to,

Identify the staff, and then they are pressurized.

They are cajoled, they're bribed, they work on them. This is our problem.

The problem is not IAEA watching (the reactors)

Israelis are using the IAEA cameras or recruiting -

Or creating damage within the structure of the Iranian nuclear industry.

This is unknown to the outside world

I don't see any way to solve this problem, and you have hundreds of people,

They target sensitive people, and then work on them. This is part of our problem.

It's not objecting to cameras watching,

It's objecting to the use of the cameras by Israelis,

They are identifying the staff, sabotaging negotiations, T and all sorts.

It's not just the cameras, it's the application and how the information is used

Q: We seem to have a camera in many different positions. We also have this camera, our soul, which watches everything, its position is in each and every moment, and each and every action we take, we watch ourselves. ..

K- It's not to be watched, it's one watches his own self.

In China - they can pinpoint where you are within 10 minutes. It's the same.

It's the use of camera, and the abuse of camera.

It needs to be understood how we watch ourselves without a camera.

We become watchdog of ourselves.

In negotiations, you watch how lies are being told - how information is abused.

Q: With the problems in today's world - difficulties with the peace treaty - how is Satan working for this to happen?

K- What does that mean?

**Q: What's happening in the spiritual level, this conflict between God and Satan?
What's happening in the spiritual world?**

**K- We are sitting in a position that most of us don't want to understand,
Or most of our leaders don't want to understand,
They are part of the humanity till their seat (of power) is gone.
It's not Satan, it's just they think they are above everything,
And they can go through everything (without anything happening to them)
For example is your president of Brazil - he want to abolish vaccine passport
What is the reason he got to that point?
Wasn't there an incident, they wouldn't let him into (a restaurant) somewhere
Nobody knew he was a president.
Then he realized that even at power of president (has limitations)
They said world leaders (WL) were supposed to be immune - don't need injections
This virus knows who the leader is - and it won't touch.
He was under the assumption, and the promises -
That were given - that WL don't need vaccination and they'll be okay
That they could go everywhere and they won't get infected.
Somewhere in New York he wasn't allowed in the building
(After that) he wants to abolish vaccine passport - he refuses vaccines
This is very clear how the finance world has become the Satan's and the rest of it.
We warned 2 or 3 weeks ago - that the leaders, don't need vaccination.
How come? It's not safe?
The world peace is the same.
The world peace is in the hands of these people
It has no meaning for them until it comes to their own homes - their own grounds
Until then it doesn't apply to them.
Satan of the man, is the man himself - nothing else
Satan is not created by God. It is created by man, for man,
Satan was create as a way to control the weak.
We don't have Satan's - Satan is manmade, by man, for man.**

**Q: How can we evolve towards higher levels if we are constantly faced with
manmade "plan-demics" executed by greedy ego driven leaders?**

**K- Don't know. They think they are above everything, until they become part of it.
The minute these people get the seat of power,
Or when people say to them, "yes sir" the whole commotion of trying to do things.
We see more and more of it.
A major corporation has reported massive profits - out of this situation
He was very proud his corporation made so much profit,
With the death of so many other people - they don't care.
He says, we are going to make more profit next year - read the news articles.
We would like to see him - his family - and loved ones in next few months - years
How they have to stand the time of balancing of their own fields.
We don't see it - because we don't follow these people after they leave power**

When they leave the seats as chairman's, heads of organizations, WL - the rest of it.
When they are in power many things happen - much is hidden by them & for them.
You have to see what happens to these people afterwards
4 -5 years ago we approached Netanyahu for peace talks - through Americans
He waited a week and few more days -
And he said, "I will negotiate with anyone but Keshe, because he'll get his way."
He used KF reactors in his design to promote Iran has a nuclear power
That's why he cannot talk to Keshe - he lied and cheated about Iran having bomb
He openly has presented it. I have shown this picture before.
He cannot sit at table - when he create so much pain and fear to millions people
Why this man has such a behavior?
Why has he used the KF reactors in presenting to the WL as a nuclear weapon?
Through his actions he turned world governments against Iran
He actually used the design of our nuclear reactors for space T.
How evil this guy has been.
He fooled the other nations into accept Iran as developing a nuclear bomb
It's unbelievable, that these people at the point of power, can do such things
We are planning to take this into court in Israel against Netanyahu for deception
And having absolutely an idiot in the White House as a president,
Or in a way, collaboration between the two leaders
This (false presentation) has become a point of sanctions.
Why do people at the point of power do such a thing?
No wonder he won't negotiate with us,
Because he used KF space reactors in the same picture - made it a nuclear bomb
(This has caused) 90% of the fear in present negotiations,
We wrote this in our communication with the 5+1.
How come the Americans have accepted this foolishness.
It's exactly the same pictures from our teaching,
The picture has been used by a WL to bring sanctions on a nation,
A nation which has no intentions of developing a nuclear weapon.
Even our own leaders in Iran were not aware of how we got to this point
We worked together to create a condition of peace - demented guy twisted it
Same thing happened when we got the Nobel Prize
Two of most demented leaders - became a cause for sanctions on Iran
We cannot undo - how they misrepresented our work
IAEA has a problem with this picture (Netanyahu showing reactor)
Because it's on the table nobody can deny it anymore.
Biden has a problem with this picture,
Because his team has to go back and say, Trump had trumped the whole nation.
This is part of our problem - than you understand how difficult the job is for KF
We worked on trying to bring a peace program, -
We developed a space program, and just look at the picture.
A WL lying in public - to bring crimes, bombings, killings (to Iran) by cheating.
You all know this reactor, it's a copy of the Iranian space reactor
This picture shows Israeli flag - brings shame on the flag and the nation.
Your space reactor - and just look the way they show inside it.

Some of you tested and opened this reactor - we've shown this structure
They are using our T in a way - to create a condition of fear.
They call it, "designing a nuclear weapons designing of Iranian .. dissemination."
If you go back and look - some of you KS working in the lab - have seen it.
This is the reactor you worked on
My knowledge to bring peace - has been used by 2 of the most heinous man - WL
To bring sanctions and killing and dying of children in Iran
This is why we take the love of God from the Tribe of Moses
When I see these - as the inventor/developer-how they used it to bring suffering
(Strangely) the Belgium's passed this to Iranians - to say I am an Israelis terrorist
They all lived in my home, and sabotaged everything from inside, lies and cheats
All work together to bring the most beautiful T - to be the most heinous.
Lining their bank accounts and men in their bed.
Now you understand when I say, I am in ashamed to be in the clothes of man.
It is not easy when you face these things and you have to fight to overcome a lie
(Look) how proud these people are to be part of this (Trump & Netanyahu hugging)
What these people have brought to us.
It's a shame for us to see how our T - to see what it has been put to
This has brought a big pressure on IAEA.
These pictures have brought mayhem in IAEA - in the past week
They do not know how to handle this.
How to work with this? How can they go back and tell nations, they accepted a lie.
So IAEA is doing its best to cover this up
And the Americans are running rats from it.
This picture is of a murderer, a terrorist -
And most evil man I could ever known to exist in the time of my life.
Where he (Netanyahu) deliberately went out to do such a damage.
Tomorrow morning in negotiations, these things have to be solved.
Americans don't know how to handle it.
The Americans, the Biden organization doesn't know how to explain -
This to the world -that they have been cheated.
IAEA is trying to distance itself as far as it can, from this position.
And what can we do?
We teach the T as messengers of peace, for you to learn how to go to space.
And we get the 2 most evil men on this planet - 2 of them
Then they're celebrating- further on this video - you see the 2 devils
What you call Satan's - hugging each other under the American flag.
(They say) "we lied, we cheated, how do we share the loot," -
by selling weapons to the Arabs.
This is where we have the problem, this is where we find pain in the T
I cannot find words to describe it, to explain it,
But how do we, how do we explain this to our people.
How can we explain this to people, that a tool for elevation of the man,
For science and T, has been used the wrong way.
And deliberately, and they are celebrating with each other for doing it.

Q: Those leaders, those countries who are superior, is there any way we could take that superiority away from them, that they don't feel the arrogance?

K- Elevate their soul, elevate their soul.

Q: Apart from that, is there a quicker way.

K- When we say we take the love of God from a tribe, (2:56). it means we give it to them, but their soul will not accept.

It's not punishment by us- they punish themselves - They block receiving

It's the same with WL they don't understand - till it comes to them

In Iraq - Saddam - used to come to weddings - take the bride on their wedding

Then we saw what happened to Saddam - he himself hid underground

What he did to other people - came back to him - they live that cycle

How long do they hide under that ground - every step they might be found

We've seen this (cycle) again and again.

You see,- we can't do much - but they do it to themselves

The reality is - what happens to these WL after they do these things is another point

A couple more generations there will be no sign of anyone following Moses

Because they become enlightened to the truth

And the way they were setup by their leaders

People used to hide to call themselves (Jews),

This time they will openly (freely) walk away from it.

The same will come to Vatican and the other (religions)

Where the people see the truth about how, and what the reality is.

By the end of this century there will be no Jews left.

Not by elimination - but by choice not to be.

(Only) the name of Judaism will be on paper - soon it will come off the paper

We don't say the end of a state,

We call it elevation of the soul of those who understand it - they walk away from it

How does every Israeli feels when they know he is such a cheat?

How do they feel seeing these pictures by the leader - children dying with sanctions.

This is the way they make their own people to walk away from their own belief.

Q: My wish is this lie of the century will come into light as soon as possible.

K- It is in the light. It's on the documentation to IAEA,

This picture is on the table of 5plus1 negotiations

Q: I hope it will be in the mass media.

K- No they won't allow it to come out

It's on BBC, it can't be more mass media than BBC. You understand?

But connecting it to where it comes from ...

This morning I had communications with IAEA in the background.

They don't know what to do, they say, "we leave it, we can't do anything with it."

IAEA offices are in the shock, because they supported it.

Q: We've been there before, not so far distant past. They cooked up all that rubbish about the weapons of mass destruction of the Iraqis. They went in there, killed a few

million, and they said, "oops there was a flaw in our intelligence." (3:02). They can simply do that if they want to. The UN was involved in that occupation, and destruction of a nation. Nonsense they built up, just exactly like Trump and Netanyahu, built up about KF reactor, which is supposed to be the most important piece of T in the history of mankind. They can easily revert everything back if they want to, and bring into the open. And say, "oops we made a mistake, somebody told a lie." And they always have a sacrificial lamb. They wouldn't care about Netanyahu and Trump.

K- You know what the Americans are doing.

Oh, this is part of it, this was not all of it. You understand?

When you go to the conference in Vienna you see a camp of reporters on the side
These reporters are told what they can record,

They are told what news they can send back to their headquarters to show.

We have the Iranian channel - everyday you go there - they are there.

It's the usual what do you call - celebrity show.

They are only there to wind it - just to say that something is there (but no details)

Even our own Iranian television channels are not prepared to bring it out in Iran.

Q: Shame on them

K- This is .. (Mr. Keshe cries a little) .. it's like a cat show. You know the cat walk?
That's all it is.

The American negotiating team has only sent 2 or 3 to Vienna, rest in London.

When we can bring the Iranians on their knees - then we fly everybody in.

Somebody in the chat says, "tell them to visit the KF Exhibition center in person .

We already done that - we have prepared that.

They are fully aware of the what do you call it - the structure.

Thanks to the KF team in Linz Austria.

We have made everything ready for IAEA visit to the Exhibition Center

They've come, we've been told they (IAEA) has already come - at night

They have visited the exhibition center in secrecy. it's very interesting.

American and European scientists were allowed to investigate our T in Linz

The exhibition is set completely to show the diversity in the technology

IAEA have been there - like thieves in the night

Ashamedly we have KS who work with them.

Q: Is there a way we can take away those arrogant nation's advanced T? Delete them somehow. Once they don't have them, they will become humble.

K- Didn't it happen to us, as the Persian Empire? And now we've become humble

They see our humbleness as a weakness - this is the problem

At that time - before the Persian Empire became an empire -

Our leaders did the same to the other nations - there must have been atrocities.

Q: Yes there have been,

K- So have we matured for 300 years not crossing our borders.

How long do we have to wait for them to mature?

Q: We need a catalyst, I don't know how.

K- The catalyst is the new T - but the time for it - starts from next Tuesday.

Q: We wish from our soul.

K- We know from our soul.

Everything is under the control of what we call, "incompetent people" -

Who (have to) reach to the point.

Whatever man from this planet needs to survive in the space - is under this roof.

This is the first time we show the Horizontal system in public.

In this machine I can grow your leg, I can change your heart.

Next to it you see the Brain system - the Vertical S - original EU for dense plasmas

Everything man has strived for thousands of years - is gathered under this one roof

There you see the space reactor in the center - the one which Netanyahu has used

Q: Why don't you put the negotiators in the EU before they sit for negotiations

Like when you go to the airport they put you through scanner units to check you.

K- Check their brain for the soul.

R: Maybe they need to negotiate with just their souls instead

IAEA has been snookered with what is on the table - why sanctions on Iran?

One you make a doubt and can strengthen it - you bring doubt on the rest of it

Part of KF job is not to create a doubt - but show the facts

Mr. Grossi head of IAEA is at the moment - on the run with this.

He's got to answer to Iran, why has he supported this

Why has IAEA has supported sanctions on Iran - when they had no proof

Why did they rely on the lie of two presidents.

They literally do not know how to handle this situation.

This lie has created the biggest problem now in the negotiation

It's not the negotiation prior to 2015.

It's the new sanctions brought because of this picture by Netanyahu to Trump.

This is the biggest problem. This is the biggest problem for us.

With our document on the table all the sanctions are irrelevant,

But the Americans don't want to accept it

I will read you part of the text of this document we presented to IAEA

It says, "now who has fooled who? Iran's new advanced nuclear space T, has

become weapon of, weapon T, by misrepresentation and deception."

For the Americans to confirm that they have been deceived will be hard

They'll have a big problem to sell this to their nation.

That Iran's new advanced nuclear plasma T is a space program development.

The system developed is to allow man to travel in the deep space,

To produce any material he needs in space, without returning to earth for supply

The biggest problem is for Americans to confirm that they have been deceived.

A nation this big with their president, to confirm that they have been deceived

It will bring a question mark on the other decisions they have made.

At the moment we are in a breaking point with IAEA over this document

Because this makes the sanctions absolutely ridiculous.

We want this to be opened up.

The American have to answer why they placed the sanctions on a lie.
Why didn't they prove it - why didn't they check their sanction policy.
It's amazing - how you as KS - sit in the center of the negotiations.
This is the fear they have - that the KF and everything will go public.
Now you can see how our T and KS who brought their reactors to Italy
How they are twisting it and making it into a weapons - by the nations who abuse
It's the lack of knowledge by the others - about the work of the KF
I see myself as responsible for every suffering in Iran - my T used this way
The fact is, how alert do we become - so that our T is not misrepresented.
We promote peace through the same knowledge.
They used our knowledge to create sanctions and pain.
Let's see what comes up and how we succeed in these works.
Hopefully we'll find another way to enlighten, ?? for next time, or next generation.

KEY-PHRASES:

We keep on expanding - deeper understanding of creation - what is about to happen
We keep on expanding in a very deeper way of understanding the process of creation, and how we as a human race have missed, and what we are going to miss, and what is about to happen to us in different dimensions (D) and dominion of the creation.

Biggest problem in T&T - not carrying the whole information in the energy package
One of the biggest problems for transmutation and transportation (T&T), is not carrying the whole of the information, or the whole of the energy package.

Like in physical life - RNA/DNA - the plasmatic M fields have the same
In the coming time man will learn like we have the RNA and DNA, in the physical life, M fields, plasmatic M fields have the same.

It's unknown to man -in time as man comes to understand it - will understand

M fields carry field forces for positioning that gives structure of physicality
That M fields carry not only field forces of positioning, that it gives them the structure of the physicality of existence

M Fields also carry the memory of what it is -where it comes from- where will go
But on the same length, they carry the memory of what it is, where it comes from, and where they go to.

M field memory of the field themselves - is an unknown science to humanity
It's something that we never knew about - we never even considered
In time - when we start transporting and transmuting - we'll need to know this
When we send the physicality (out somewhere) - where is its memory?
What is it going to be at the end of (the travel - when it arrives at the destination?)

We understand the information part RNA - & physical part DNA - for T&T

Understanding of the, what we call, the present time, the RNA, the information part, then the physical part, which is DNA, becomes part of the game to be played for T&T.

In the VEU - we can transmute the physicality - in D of fields of an atom

Which means in the new system that we see, (:24). for example, the Vertical Enhancement Units (VEU) which are getting developed in KF, we can transmute the physicality, the D of the fields of an atom.

When you re-manifest - how to keep the cell of liver - in the liver and not in brain

But when it comes to the other end, how do you place the cell of the liver in this position, and not in the brain, and the cell of the brain, to know where to position itself, and not in the kidney.

The part of the plasmatic field that carries information - unknown to humanity

This information carrying part of the plasmatic field is an unknown knowledge to humanity.

We will teach you about the RNA of the M fields

We'll teach you how to transport & transmute - carry it across the span of U

How you transport it, how you transmute it, how you bring to make sure the plasma of the physicality, and the PI of the information, simultaneously carry the span of the U.

When you arrive - you'll be able to put the plasma back together to be a human

You get there in the D of physicality, and everybody, how to put this PI together to be a sign of a human.

With the fields you carry the emotion and understanding of the structure

It's not just carrying the fields, it's carrying the emotion, carrying the understanding of the structure.

You carry it in a way - that the cell knows it's for reproduction or whatever

Carrying, in a way, that it says, I am a cell for reproduction, .. for conversion of the environmental energy into a physical D.

For example, it knows in this atmosphere there is no air, - so no need for me

In this atmosphere there is no air, is there a need for me.

In this atmosphere there is no liquid - do I need to adapt (myself)?

In this atmosphere, this condition, there is no liquid, do I need to adopt

Shall I show myself, or do I become part of the memory bank of the plasma (PI)

I stay in memory bank - till PI travels to another D where there is liquid

(I am needed) to be able to survive in liquid environment

RNA in the knowledge of M fields is hidden -but very apparent -once we understand
The RNA in the .. knowledge of the M fields, (:26). It's hidden, but very apparent, once we understand the position of the GM fields of any entity.

We call it line of order - or line of communication within structure of body
What we call the line of order, the line of communication within the structure of the body of the man.

This is vital for us to understand - that when we land on a planet
In this planet there is no need for an arm or leg

Understanding of the emotion of the plasmas - will decide what shape best fits
The understanding of the emotion of the Pl of the physicality, and emotion of the Pl of the STM, decide what shape fits you, befits you.

(By comparing) how other life forms managed to exist in this environment
How other creatures, how other forms of life have managed to exist in this environment.

(Discovering) what I need to have to exist here
Or what do I need to exist.

I go back to the memory as a cell of the physicality
In the RNA of the information
Because there is no DNA of physicality
And I say, "I need a system," to survive to absorb the energy of this planet
This position in time and space - in this galaxy

The RNA of the M fields in sacrosanct in understanding the T&T in deep space
The RNA of the M fields is sacrosanct in the D of understanding the Transportation and transmutation (T&T) in the deep space, even though on this planet it might be easier.

We cannot send the emotions through the telephone lines
Nowadays we pick a phone, we send an information, but we cannot send the emotion through the telephone line.

Our emotion can be misread on telephone - sadness mistaken for happiness
We can express our emotion on the line for the others to understand, and even if our emotion is a sadness, they might read it as a happiness, even though, (:28). our emotion inside is entangled in joy, they might read it as a sadness.

In the D of the plasma technology - the emotions cannot be misread
In the D of the Pl T, understanding the T&T of the fields of the U, there cannot be such an error.

In deep space travel you use the emotions of the STM - not the physicality

In this process, the mankind will come to understand, that the Pl T of the .. deep space travel has to be understood in the emotion of the fields of the STM, not the emotion of the physicality of the man.

Emotions of the RNA of the T&T will behave like M - stronger in confirmation

Where the emotion of the fields, or what we call, the RNA of the structure of the T&T of the fields, of the creation will behave M, stronger part in confirmation of the existence, at the point of manifestation.

Plasmatic field flow lines of RNA can be seen - emotions carried with entity

If and when the mankind be able to see the field flows within the structure of the plasmatic fields, he will see these lines of the RNA of the M field, of the line of information, the line of order, the line of T&T of the fields of the emotion will be carried for the first time with the entity in the D of .. transportation of the fields.

The fields carry a load to the point of destination - interact - create new position

Which means the fields, when it carries itself to arrive at a point of destiny (destination), it's got a ?? low (or load?) carrier, one is .. D of physicality, and 1 D of the information of the physicality, that in interaction with the new D, a new position is created.

RNA of the M fields - last stage of understanding the process of creation

RNA of the M fields is more or less, one of the last stages of understanding of the process of the creation. (:30).

When man understands how to carry the emotion of the soul of the entity

Once man unravels the knowledge, once man understands how to carry the emotion of the soul, man, or the soul of the entity.

Then the soul in T&T of the fields - will bring RNA and manifest physicality

Then the soul in T&T of the fields will bring that RNA to ?? and according to his need, according to its structure, will create the physicality of the need, at the point of the manifestation.

Humanity has got a lot to learn, humanity has a lot to understand

When I take you from A to B - I carry your emotion and manifest you in different D

It's not just I take you from A to B. But carrier, I carry the emotion of you, in a different D of physicality and ?? impression, and existence.

At the beginning - mankind surely will fail 99 out of 100 times of trying

But if you understand RNA & information carrying part of M field - will succeed

But if you could understand the .. RNA and the information carrying part of the M field, man will succeed to .. conquer the space.

Otherwise - like many races - you'll take refuge in UFOs - in D of physicality

Otherwise what we have seen with many races, you'll be taking refuge in UFOs, flying systems, and all sorts of things to carry the physicality and hopefully .. emotion of the STM in that D, will still be within the D of physicality of the man.

There are races who have achieved the "Holy Grail" of creation

But those races who have matured to the point of understanding the essence of the creation and Creator, and existence in all D, will know, they have achieved, what we call, "the holy grail of the creation,"

They can T&T the emotions of the soul & information about existence & emotion

T&T of the emotion. Emotions of the soul, T&T of the information about the D of existence, (:32). and the emotion.

Then you can replicate the man in any dimension (D) in the U.

Replicate man - with the same emotions - understanding - and feelings

But it might not (manifest) the same (way) at the point of arrival

Mankind is about to become a true man of space

When he understands transmutation/conversion of information of emotions of STM

When he understands the process of the conversion and transmutation, of the information of the emotion of the STM, and not only the STM.

Biggest problem - understanding the strength of fields of the emotions

One of the biggest problem for humanity has been to understand the strength of the fields of the emotion.

We see electrical (impulses) in brain where joy & sadness - but signals don't exist

We can see in the electrical systems, the place of the joy or sadness within the brain of the man, but these signals are not, they do not exist.

The (emotions) cannot be transmuted and replicated, if man does not understand.

Man must understand the plasma of existence, and Pl of the source

When it comes to the process of the transmutation of the STM, the Pl of the existence, the Pl of the source.

In the coming time, the transmutation systems - will carry this D

Means man will see the soul & emotions - understand them - international language

Which means not only man will see the soul, but man will see the emotion, understand it, and it has international language.

In the past teachings - I touched on this a few times in a very soft way.

The color of interaction with entities in space - will tell you their emotion

As I said, when you see another soul, when you see another entity in the depth of space, the color of the interaction, will tell you the emotion of the entity. "My friend, I want to touch you, I want to smell you." (:34), I want to be part of you, I want to love you.

Space colors will be created out of interaction between you and the entity

But these will come in the D of the interaction of the fields of you, and the fields of the entity, and in that interaction creates, .. space colors of interaction.

The red, blues, and greens are not the ones we see - the way we are used to.

We have seen these plasmatic colors with Gans's - sometimes - never understood

We have plasmatic colors, which now we have seen sometimes, even with the production of Gans's, but we never understood.

Are the colors you see - the same ones I see? my eyes create slightly different

We just call it the green one, and the red one, but is that red the same to my eye, and to your eye.

Does red mean danger - or the saving of life

Is that red, does it mean a danger, or does it mean it's life-saving, or does it mean a giver of life.

Why is CH3 orange, and your other H's - all in the same color bandwidth?

Isn't that the essence of the creation of the fields - "I want to give to you"

When we are space passengers and see these colors - means a source of energy

Does this mean, that when we become passengers of the space, when we see these kind of colors, it means to us, the source of energy, you want to give me.

What happens when you see the D of the Gans's of the lead?

If we see in depth of space - does it mean that object wants to take from us

Does that color, or spectrum of that color, when we see in the depth of space, does it mean that object, wants to take from you.

Mankind has to learn in space - which emotions manifest which colors

It carries the emotion in respect to color, it carries the emotion in respect to existence. Mankind has to understand now, the color of emotion, the manifestation of its presence.

When you get angry you grow red.

Does it mean you are feeling the emotion in the D of physicality?

You have to learn the essence of the fields of the emotion - without the physicality

What you have to learn is the D of the emotion of the fields, in the essence, without the physicality.

There is a common interaction of the fields in the U - (emotions are) the same

In the interaction of the fields, which is common in the U, the same.

A given color, feature, and life - means "I am in need" - I am not stealing

When you see a given life, given features, given color, it means, "I am in need." I am not stealing, but do you got anything to give me in the energy level?

Another colors means - "I want to give" - I have so much - I'm part of Creator

In another color it means, I want to give, I have so much, I have become part of the Creator.

Do you tap into it?

I have this field strength and I am ready to take - what do you want back

You say I have shown, I have this field strength in me. I am ready to take, but what you want back from me?

How can I give you from the essence of my creation?

What will you give me - to stay within the boundary of the existence?

Biggest mystery to man is understanding field strength of the emotion of the Pl

Mankind in the coming time will understand the biggest mystery of the life of the knowledge, is the understanding the field strength of the emotion of the Pl.

Now you understand why the magnets move when you add one to them

Then you understand, why when you put the magnets on the table, and you add one more, it moves.

The other magnets move - because I am here to give what you don't have

It make the other ones move, because I am here to give you what I have, but we don't have.

We haven't created the T to see the field interactions and colors between magnets

We haven't created the T, to see the field interaction, the color of between these magnets the joy, the happiness the accommodation, the position. "We do everything for you to find a place amongst us."

When you put the magnet on the table and it attracts the other ones.

What does it mean, did you see the emotion of the fields before they interact.

We call it North and South Pole - Entry and Exit

In the simple language of the man, we call it the N pole and the S Pole, (:38). we call it the entry and the exit.

But how does that entry takes place, what is the emotion transfer between them.

How many of you have created Gans's and tried to see if Gans's pull each other.

How many of you have tried to see if the energy of the Gans's bend?

What colors do you get by putting one Gans in with another - in replication (cup)

What happens if you put one Gans in another one, in the cup of .. replication of the fields, what colors are in there, what we call, in the liquid, the water which is in front of you.

We are not trained - we do not understand

What emotions do the CuO and CH₃ bring?

(Does it matter) who made them or how they were made?

Were they made with the joy and happiness - is the soul of the Gans is a happy soul.

What happens when it adds its energy to the field of the water in the bucket?

(Maybe) the color of this water - means it's not good for me?

But now you pick any cup, put Gans in it - and drink the plasma water

But you haven't looked at the color of the emotion of the Gans.

You have not learned the knowledge of T&T -of this field -what it does in your body

You have not learned the knowledge of the T&T of this field within your body, what it will do.

At the moment, we are at the early stages, and we see some results and we follow it.

We will train ourselves to see the color of Gans's - like with night vision glasses

But in the coming time the way we have trained ourselves with the night vision, we'll train ourselves to see the colors within the cup.

It might be a color, which is good for you - but not good for me.

I don't drink it - and hope it will become good for me.

This is all part of the RNA and information carrying part of the Pl.

This knowledge has been unknown to man until today

The races who understand and conquer this - will be able to see emotion of Creator

Those who will understand, the races in the depth of the space, who can conquer this, will become those who can understand, (:40). and be able to see the emotion of the Creator, as they have tapped into the D of existence and understanding of the totality of the creation, not only in the M field, but in the emotion of the fields.

Blessed are the soul who get the elevation to be able to see these colors

Blessed are the souls who get to the elevation and the position, that they can see these colors.

A few races in the depth of space have managed to reach this purity

A few races in the depth of the Unicose, have elevated themselves in the purity of the creation, that they have managed to reach this point.

It's not far when you become detached.

It's not far when you become detached from emotions of physicality

It's not far, when you become detached from the emotion of fields of the physicality to the D of the emotion of the physicality in the direction, of the emotion of the STM.

Emotionally you get excited, your heartbeat goes up.

What happens when emotionally, the plasma of the STM gets excited?

Would it change his color, .. emotion, .. his position

Would it reposition you to have a constant emotion of physicality

Would it change at all for you be positioning yourself and repositioning yourself for you to have a constant emotion of physicality

(Emotion of physicality) denies you from observing its real true emotion.

The emotion of the STM - will carry the correct information for manifestation

In the coming time, you will see the characteristics of the emotion, the strength of the fields of the emotion of the STM, in the confirmation of the existence, and carrying the correct information for the physicality to befit itself, (:42). in the D of manifestation.

Before mankind had no knowledge - now you are responsible to find its source

In the past, mankind had no knowledge, now as we said before, you understand, you are responsible to find the source of it.

You are responsible to understand how to double load the STM's fields

And the soul of the emotion of the man's fields - on the same track

Then the field lines carry the emotion of every cell of the body of the man.

Otherwise you'll have a man with no emotion, even though the STM exists within it.

(This happens when) the info of the emotion of the soul - never arrives

Then physicality, by repossession of the both, the STP and the STM, because the information of the emotion of the soul, never arrived, or it's misguided, and its diverted to another position and time.

And you have what we call - the "cabbage" of the soul

(You have a physicality) - waiting for the info of the emotion of the soul to arrive

Not much, it's just there, waiting for the information to arrive, the information of the soul, .. of the emotion of the soul.

(In the mean time) you can blindly follow using the system -until you understand

Humanity has got a lot to learn, but in understanding the way we create our systems, you can blindly follow, that one day you might understand.

The purpose of the teaching is for man to understand the knowledge

The whole purpose of the teachings is not to be the man of today, that you go to the shop and you buy a telephone, and it doesn't matter what's in it, as long as I can hear it, say, hello, and yes and no to my dad, I don't care what's inside it.

True man of space-understands every motion-emotion-transmutation of every entity

With the knowledge of the U, you have to understand every motion, and every emotion, and transmutation of the field of every entity, before you become a true man of space.

Otherwise - we have to carry your physicality in UFOs

Otherwise, as he says, (:44). "ladies and gentlemen, please fasten your seatbelts because we are carrying your physicality."

When you stick to physicality - then you have entrapped the soul in it.

The spaceships of the STM - is within the STM

And not within the physical spaceship of the man.

Understanding the knowledge and T, is part of the T&T of the life.

Part of the existence of the true life within the space.

Man will understand that every creature is the same

We are approaching the point, where the man will understand, that in essence, every creature is the same.

Every fields of the soul of the creation is the same

But (when it manifests) - then it changes in the D of the physicality

"I have created man in the image of Myself."

Not in the D of physicality -

But in the D of the fields of the souls and the emotions of the fields of the souls.

(It's) the information which (it) carries within.

But man is so feeble that he thinks the Creator has 2 arms, 2 legs, and 2 eyes.

I gave you the eye to see - but in the D of the STM

I gave you the field strength to observe, to understand the emotion of the seeing

And not to physically to see.

Man will mature to understand the process of creation - not the way he have chosen

In time, man will come to understand more and more, .. mankind will come to mature to understand the process of the creation through the true way of the life of the Creator, and not by the way man has chosen, (:46). the physical D.

One day we'll become mature enough to reach the M field information

Maybe one day we'll become mature enough, we'll become in a way, complete enough to be able to reach the D of physicality's , what we call, M field information, and then one day, ..

Some of the children of Adam- the Creator - will come to understand

Some of the human race, the children of the Adam, as you call it, which is the Creator, might become mature enough to understand the process of the creation.

21st of December is approaching - you are waiting to see manifestation of Mitra

We are approaching 21st of December, many of you have set life, to see the change, the manifestation of Mitra.

Mitra has manifested itself in the D of physicality millions of years ago.

But in the D of the physicality of the soul - not in D of physicality of the man.

The time of Mitra - means man will understand full process of creation

Not only for man, but for the rest of the creatures of the U.

It's the birth of the totality in understanding the love of the Creator for its created.

Many of you will endeavor to understand the process of creation -

Through understanding the process of created.

If mankind is to achieve knowledge of creation - walk away from D physicality

But if mankind is to achieve through knowledge of creation, mankind has to walk away from what he understood about the D of physicality and life of the man

"I made man in the image of Myself."

In the D of the STP - and the D of his soul of the created - and the STM itself.

Maybe one day mankind will understand the process of the creation

Understand the true essence of it - and not the dream of it.

What will happen

The way it will happen

And the way mankind will decide for it to happen to itself.

Many of you will understand true process of creation through T&T systems

Many of you will come to understand the ... true process of creation through transmutation and transportation (T&T) of field strength of the systems.

When we transport you from one EU to another - not by physicality anymore

When we transport you from one Enhancement Unit (EU) into another, we don't transmute anymore your physicality.

We have made teleportation

T&T of both the fields of the Pl of creation and the emotion of the plasma

What we call, the condition of transformation and transportation of the both, the fields of the plasma (Pl) of the creation, and the fields of the emotion of the Pl, which has created that emotion and that physicality, in the D of the emotion of the transportation.

In a way - the RNA of the RNA

We are carrying the information of the existence

Plus carrying the information of what it needs to exist -

At the point of manifestation, or detection.

At the moment - it's only important for you to see the UFO - the rest later

In coming time we'll try to teach more, but for many of you, .. at this moment of time, all is important, is to see a UFO, to see you can fly, (:50). and then we talk about the rest later on.

**We leave it to our next generation to sort it out
Because we have seen and we believe in what we see.**

You want to see a miracle - because you believe that will lead you to understand
I gave an example in the recent past, and I go back to it for you to understand the reason why I gave you it. You Knowledge Seekers (KS), and the human race would like to see a miracle, that the miracle leads, for you to understand

By seeing the light you might possibly see the light of the Creator
To see the light, to see a confirmation, affirmation of the possibility that by seeing the light, you'll see the light of the Creator.

**You (think) if you see the light of the confirmation of existence
This shall show your power - and what you can deliver.**

I have shown UFOs or shooting stars to a number of KS
As I explained, and there are a number of KS who can explain to you, I have made them to see the light, what you call the UFOs, when you ?? see the shooting stars.

**I never created the shooting star.
I created the fields of the emotion of the soul
That the STP of the man, reads the emotion and calls it, "a shooting star."
We have made it possible that for 3 to 5 souls to see it at the same time**

We have the knowledge of the common denominator field strength of observation
As we have a long knowledge of the common denominator field strength of observation.

(We can make) the whole of humanity to see the same light at the same time
For me to confirm the totality of the control, is that for every single one of you, and the rest of humanity, at the same time will see the same light.

It doesn't mater where you are - even underground - you will see the light
It does not matter, (:52). if you are at the North Pole or South Pole, if you are under the ground, or you are on the mountain.

Even if you all see the light - will that light enlighten you to knowledge of creation
Then you will understand you all have seen the light, but has that light enlightened you, with the knowledge of the creation?

Whether you all will get enlightened - is questionable
That's questionable, or just happened

Even man in the deepest caves will see the shooting star

Because we have created that impression through the STM - not physicality

Because we have created that impression through the STM, and not through his D of physicality.

In a way - we have put you in a state of dream, and we control the show.

Many of you KS will come to understand the teachings of the past and the fields

In the coming time, many of you KS will come to understand, that the teachings of the past, and what is going on now, was and is, to direct you to understand more about the process and the interaction of the fields of plasmas, in the D of the Gans or in the D of physicality.

Would all the Gans's within the same pot, decide one Gans should be elevated -

And they all give their energy to that single Gans.

Would the shape and the emotion of that single Gans -

In the D of physicality be the same, now that it has received all these energies.

Today I have opened the rigma (rigmarole) of the life.

How you can unravel this rigma

It's your level of understanding about the true level of creation.

How far you go as KS - will be the biggest battle for every single one of you

How far to what extent as KS, gather the knowledge of the past, (:54). to confirm the existence of the tomorrow, for their own soul, will become the biggest battle for every single one of you.

We have seen the Corona and the mayhem, which will come with it in the future.

The strength of the emotion within you - will decide -

If I want to be in this D - to be given, to be enforced to be given

To be conditioned for my physicality to live, to be here

To accept, the "to what can come to harm my physicality."

In that process - through realignment of fields of emotion of physicality & STM

In that process now, because of the realignment of the fields of the emotion of the physicality and the STM

And understanding the interaction with the STP - you shall decide

If you are taking fields of the energy from the U with all the carrier info part -

Or only the fields of energy

Then what do I have to give to create the emptiness (to receive that part)

And what do I have to do, and what do I have to give, that create the emptiness for that to arrive.

Humanity has entered the point of what we call, "creation."

The true essence of creation, the true understanding of the process of creation.

Maybe some of you KS will reach the point you don't have to seek any further

Maybe, maybe one day, some of you as KS will reach the point that you don't need to seek any further,

You understand the process and see the light of the emotion & RNA of your soul

But you understand the process, and you shall see the light of what I call, the emotion ?? and RNA, (:56). of the fields of existence and your soul.

At that point you are mature to see the light of the Creator,

And with it - become part of (it),

As you have seen - to become part of,

Because by seeing you have accepted to receive the totality of the knowledge

Of the RNA and DNA, both with information and physicality,

Of the existence from the source, from the point of creation.

The true essence of this comes - as we are approaching what we call, Christmas.

We all speak about the shinning star, the Star of David.

Is that star, a true star?

Or was it seen by the souls and accepted by the sum of the totality of the physical life

Of those who wanted to believe seeing the star.

Did the star carry the same emotion & info in every person who saw it?

Then did that star, emotion and information carry the same emotion and information in every single person who has seen it,

Or was it just only for those who followed the path of Christianity?

Now the question of existence takes different shape.

Is the Star of David the light through interaction of the emotion of the fields,

Of those who wanted to see interaction and emotion of the fields of the Creator

All within the structure of their own soul

The burden of knowledge,

The burden of learning the knowledge,

The burden of understanding the knowledge,

Is upon you,

To understand the process of creation of the information and emotion of the STM,

That with it -you can create essence of the source of communication,

And emotion of your physicality,

In any dominion, and position in the U, in the Unicose.

Then you understand how, we have lived amongst men for thousands of years

As we understood the transformation and balance of the energy of the STM

As we understood the process of the creation and transformation of the essence of the knowledge, and balance energy of the fields of the STM.

I hope many of you KS will mature to this point very fast.

The birthday of Mitra in coming days - is the enlightenment of the man.

It is the birth cycle of the creation

As Mitra is amongst us, has been, and shall be -

In the essence of the confirmation of the STM - not the STP of the man.

Those of you who want to see Mitra with your own eyes

Will see the light of it on the 21st.

Those of you - expecting to see the physical D of the birth will have a lot to learn,

As you have to convert D of the physicality from the source,

From the top - then humanity in one instance will mature.

The teaching of today is not for faint hearted,

The teaching of today is for those who are deep thinkers -

Those who understood the process of the teachings of past years -

And can manage to convert it, and complete it,

With interaction of the fields of the man himself.

Before when we taught in physical D of reactors - we needed 3 to 5 hours

As I said before, when we were teaching the physical D of the reactors and whatever, we needed 3 or 4 or 5 hours teaching.

Now that we teach in the essence of understanding - only one minute is needed

But that 1 minute teaching - needs thousands of years of understanding.

It's for you to decide if you have matured enough to understand part of it -

Or the totality of it -

As you have learned to walk - now you have to explore the ground.

The teaching of today - took many, many thousands of years of contemplation

Questions

KEY PHRASES

Q: Are the colors of the emotions of the RNA and the soul - ability to see color?

K- It's the emotion of the color. It's a feeling rather than physical representation

Q: So why did you call it a color?

K- Because that's how you understand it.

How else do you want me to call it? .. The human race has not managed to complete, that kind of wording for the color of emotion

Q: Will different souls as they develop this ability to see emotions - will some see it, feel or hear it? Will each soul will learn to sense it in a different manner, according to their own makeup?

K- Not really - I have explained this before in a teaching before, you can go over it.

Now we have to learn the same emotion - but at the level of the STM.

There is no difference, but in understanding,

You are living with a different, approach, more or less to the same thing.

We have to learn what different emotions mean in different universes

So we got to learn what it means in a different U, "I want to eat you." Or you are delicious, I want to fall in love with you.

Emotion of the soul is similar, but in different ways, than the emotion of physicality.

Usually emotion of physicality has Attachment - detachment - and expectation

Because usually emotion of physicality has an attachment, and detachment, expectation.

Where emotions in the D of the soul - there is no expectation.

You see when you love someone, you expect to be loved back.

In D of creation or the soul - the love you give, you don't expect to be given back.

But you know you receive it back from somewhere, not necessarily from the lover,

That gives you the emotion to give more.

It's very hard to fall in love with the D of the soul, because it is a one track lane.

Q; I have a titanium plate in my left hand, can I use the Visual EU without problems. What advantages does the VEU have for my brain?

K- VEU is setup for a specific characteristics, and specific jobs.

As it's in the lower part of body - It should not be effected with it at all

What you can do - depends what is wrong with your brain, that you expect it to fix.

But these are a special systems built for a specific purpose.

Even the Body EU are not all the same.

We build them according to what we want them to do.

The 48 units for AZ are built of 4 different characteristics - for different jobs.

We develop them according to what job they are going to do.

Your condition might require you to sit in different combinations of EU

Maybe you need to sit in 2, combination of one and four, and somebody else needs combination 1 and 3, and (someone else) needs 3 and 2.

We'll train doctors how to use which combinations for what purpose

That's why we bring doctors in and train them how to use, in each combination, and for what purpose.

For example if you have a stroke or leg damage you don't need VEU

If you have a stroke, your arm and leg are damaged, you don't need a Vision EU. If you are blind you don't want to get your arm and leg working, because they already work. Or you have a problem with your Cataract, but you have another problem with your neural system of the part of the brain regarding the vision at the same time.

The systems are setup for different applications.

Q: As we have 1 M hand and 1 G hand, would it be possible to absorb the energy of the U with the G hand, and transfer that energy with the M hand, if it is possible, please teach us?

K- We already do it. We absorb 80% of our energies from the environment,

Most of the energy is absorbed through our fingers.

When one hand is attraction and other repulsion - create friction and light

When you put a position of attraction and a position of repulsion, or 1 hand giving and the other one taking. At some point, focus to end up to be together, you create friction and create light, and then see what we do.

In ancient time man could do this - today man has lost that capability.

Hold your hands in specific way - bring together conflict of fields - create light

If you could hold your hand in a specific way, that you bring together the conflict of the fields, (1:22). then you can create a light between your hands.

We've shown this, it can be done, it is very easy, but it takes a lot of energy.

But you can tap into the universal energy fields, with the position of your fingers, And just receive that energy and create that light.

But that light energy is not necessarily in the vision of the man,

It's in the essence of the energy of the STM, you will see the light through the soul

First practice you'll do when you become aware of how to use your soul

It is one of the first practices that you will do when you become aware of how to use your soul, and confirm the existence.

You see with the eye of the soul - not the physical eye - see light but nothing there

With the eye you don't see, but with the eye of the soul, and observation of the soul, you see, you don't know, where am I seeing a light, when there is nothing.

(When this happens) then you understand you reaching that point of maturity

Biggest problem with humanity - only accepts if visual sense or one of 5 senses

The biggest problem with humanity is that he accepts it if it is a visual sense to him, or in one of his 5 senses.

**Mankind has to learn to transfer this - into the emotion of the soul,
Then you'll see different lights -different understanding - feel different emotions,
But you will still see - to confirm the existence.**

**Yesterday I was in 5plus1 negotiations group.
It's amazing how much energy is wasted there.
You see how much waste, sitting there, just to satisfy the ego.
After a few minutes of it, you just want to walk away
It's not there to support humanity. It is there to support the ego of the few leaders.
When you walk out of it - you feel you've been in a chamber for 20 years
The energy depletion is amazing.
It's the only way to do it though - to be physically being present and doing things.
At the moment we are involved in so many different directions and works
Somehow the energy comes, somehow you manage, (1:26).
(This is to inform) the KS - U Council supporter - negotiations are in a rough time
There's little light here and there, but overall we need a lot of support
What I see from close quarters - it's going to fail.
Because the ego's of leaders - bigger than what can be delivered by one or the other
It drains you to see how collaboratively people are sent to destroy each other.
It's interesting - how collectively they agree to do the same
Unnecessary demands suddenly pops out
Because "we don't want to do - you accept or we change something else"
It's the responsibility of all of us - to change the soul of the leaders and negotiators.
We need a lot of support.
I don't get disheartened - but I see the next step, the next stage -
What can be done and how people walk away, or create a condition -
for others to walk away, to confirm that they have won, or are doing something.
We have seen some positive results, but we still, there a long way to go.
It can literally fail. We'll see after Friday or Sunday, how it will take shape further.
But there are some small breakthroughs, but we'll see.
We need a lot of support from all the KS**

**Q: The prophets of the past, despite offering good news, warned of difficult times,
and apparently we are already in an era of limitations for human civilization. If we
don't align with the ethos of the U, and we don't get a peace treaty between the
nations, can we enter into an era of cataclysms on earth, as a purge and correction
of the course of human civilization?**

K- The time of purging is finished. (It's) the time of maturity and understanding.

**KF submitted a dossier to the negotiators - It's very simple.
I read from one of the pages - one day it will be published.**

**It says, "Iran will share collectively, and develop new T with all nations.
If agreement for sharing this new T is not reached with Iran on this basis in Vienna**

Iran sees as its right to share the new space ?? and the space defense T - with any nation as it reaches its goal of, T in exchange for permanent peace."

**This is a problem for leaders of leading nations - to commit to permanent peace
We are very clear - we are not there to put conditions on the sharing of T
We are giving it freely to the nations if we don't reach 5plus1 agreements.
For them it is hard to accept, that they have to share T,
Because then they loose the superiority.**

In another paragraph of the material - it says, Iran puts no condition for sharing and collaboration in sharing this new T and knowledge, with 5plus1 and other nations, to produce pure plasma nuclear material for space energy and defense.

**Our message from Iran is clear, the Iranian nation and leadership
Is prepared to share openly with 5plus1, the full plasma preparation,
Which means we produce nuclear materials at a 100% rate.**

**They cannot believe Iran is prepared to share such a technology (T)
When we wrote this document the condition was, that we share openly.
It's hard for our leading nations to accept,
That they have to become equal with the other nations in knowledge and T.
This is the hardest thing, which I see, and it's totally unbelievable
How some of the world leaders, and people who like to keep the superiority,
Do not want to sign themselves to peace. (1:34).
What is going to happen, what is about to happen, what is there to happen,
In the D of physicality, what I call, bribery of the largest scale,
All sorts of contracts - if we go along with what they want.
80% of American demands on Iran have nothing to do with nuclear industry
80% of American government demands in the 5plus1 negotiations
It's the same with the Europeans - has nothing to do with nuclear industry.**

**Major demand of Biden - Iran does not supply electricity to Iraq or Afghanistan
One of the major demands of President Biden, is that Iran does not supply any electricity into Iraq or Afghanistan from our main supply grid, to support the nations.**

**This is unheard of. When we hear this in negotiations we just pull our hair.
Iran supports other nations - it's neighbors with electricity - they say cannot do
This has nothing to do with nuclear industry - it's not what we are there for
We have to oblige in order to get the sanctions removed.
(They are saying) if you want to help your own nation - don't help your neighbors.
How come France has agreed to help Europe?
If the British Oil falls short of energy, they tap into French energy system
Because French with nuclear power, guarantee supply. The same with the Germans.
But if Iran does it - it's a criminal offense and they have to be sanctioned for it
Sometimes when I look at the negotiators - I just cry.
What the heck are we here for?**

We just give and give, for what? - (to be told) - not to do
We want to share the T, we are sharing everything.
They say, "No, you cannot share, because the others will be equal to us."
It's an amazing construction of hypocrisy in ?? - and a lot of other things.
It's not only the Americans,
It's mostly from the Iranians - who say.
"Give us this, give us that, we'll do this - this is my bank account, that's yours"
Little achievements, but in general totally tying up a nations not to do anything.
What does helping your neighbors with energy supply -
Got to do with negotiations on nuclear power, or what they call nuclear weapons

Q: What is the fastest way to converge the STP with the soul of the nonphysical part of our being. What is the secret key?

K- Die (they laugh ..) It was a funny answer to it, but it's understanding the trust I mean that's the answer for the human being - today.
But we call it sacrifice - or martyrdom - all sorts of names put to it.
But in reality it's to understand the work and the connection

In ancient time, there were races who could retract their fingers and extend them.
They could retract and extend their arms when they needed.
For saving - not taking what you need from an environment - or for protection
Of course they had control over the emotion of the STP.
We all can do that, it is not hidden from us. We just ignore the access to it.
We just have created a blockage - so that we don't hear.

For example living near a church - you eventually stop hearing the bell

I said, this is like a bell. You know when you live near a church, (1:40). and the bell goes every hour, "ding dong" .. and you hear it. When you live by the church so long, you don't hear the bell anymore.

Your STP and physicality have decided, " I am ignoring it"

But accidentally you hear the lunch "ding dong" - It's the same.

We have decided, not to listen to the "ding dong" of our soul.

Now we want to wake up, but there is a lot of clogged information in-between

We need to dust, to be able to get at it - and then we'll see (again)

It's not - that it is not there.

We have created these barriers for not to hear it. Not to confirm its existence.

Unless you find a ladder to the Creator, in a different way, or to your soul.

In Vienna they put a ladder on top of the main church in the center

The steps to the Creator, how far you can go with it -we listen to it every night.

From the church you can find your way into the depth of the U - to the Creator,

But not when they give you a physical ladder.

It's us who have created those steps on the ladder - for ourselves over time.

We made this ladder bigger and longer with more steps.

When you go the full length of the ladder,
It's twisted and you come back to the same point - where you started from
It's a funny way, because you don't see the end of the ladder
You don't see, that the end - actually comes back to you.
It's us who makes it longer or shorter, according to our beliefs and understanding
It's like the camel rides on Tenerife
You think you are going for a long ride - but it's only 2 minutes
We have denied the knowledge to ourselves,
We have denied the affirmation of the existence and communication to ourselves

Q: In the spiritual world many people talk about opening up the Third Eye, the pineal gland, Could you shed some light how to open our Third Eye?
K- Isn't the pineal gland another way of saying - get access to your soul?

We don't hide - duck and dive - we just go directly for it (we tell it straight)
Isn't the Third Eye your soul, but you become aware of totality, your creator
In different time, different generations, and different intellectual understanding,
The same thing has been explained in different ways,
So people could think, understand it, and follow it.
Now with the teaching of the KF there is no ambiguity
It's there and you can find out - where you try to hide it.
Why do you need a Third Eye when you have access to your soul?
If you look at the position of what they call the gland, and
Look at where we tell you, your soul is at. It's not very far off, is it?
Because people couldn't understand the STM is within the structure of the man.
So now it becomes the pineal gland, the Third eye or whatever.
If you manage to get access to your soul you can call it anything you like.
We are enlightening you to understand - to find it yourself.
Mankind has not been kind to himself, and denied himself many, many things.

The negotiations will go till Sunday night, and then we'll see.
Most probably people will return back to their countries for holidays
They'll come back after Christmas - if they come back.
There is a very high possibility, that they might break up.
These negotiations are very much one-sided gun policy, shotgun policy, I call it.
And the Iranians are not helping it much.
We still need a lot of support, it needs a lot of understanding,
One of the problems is that the sanctions are very complex (network)
But our Iranian diplomats are not very seasoned diplomats.
They are not mature in negotiations - that's a problem with the Iranian team
The Americans are sitting in London - not in Austria,
Both the European and British teams are extremely seasoned.
They understand how to play.
The Europeans and Americans play with seasoned diplomats.
Iran doesn't have that.

New Iranian government - using relatives as negotiators to fill bank accounts

We have a government who has been in power for a few months, and cousins, and uncles, and son-in-laws, .. and they're put in position to negotiate, to make sure the what do you call it, private bank accounts are looked after.

It's a very dirty game - extremely dirty game.

I call it - European version of Birth of Mitra - We choose 3 or 4 days difference

Q: Is it best to try to receive the fields at dawn when the birds are singing?

K- Would you like to be onboard a plane - have dawn all the time, 24 hours a day

The Iranians are looking to build a space center in the desert

There is an ancient waterhole - the animals know for centuries to come and drink

In space man will find places where fields gather - to absorb the tastes of the fields

Man will find, even in the space you'll find the places where the fields are, to our "tastes" as I call it, and we just go there to absorb tastes of the fields, that it could taste of the banana in the west.

In the RNA memory bank of the M field - "this tastes like a banana on earth"

And you say, "oh, in the memory bank," in our RNA, memory bank M field, it says, this was the taste of banana on earth. (1:54).

Whether it will raise the same emotion in the D of the soul - Is a different matter.

Q: Someone asked, is there a ritual for "giving from my soul?"

K- No we never create these kind of things.

You've got to go within yourself to find it

We never made holidays to be on a Thursday or Monday, temples to worship towards, we never do anything to create that kind of ritual.

There is no shortcut - till you understand it

Q: It means we have reached the point of maturity of our soul if we can do it.

K- Yes, more or less .

Q: (A question rambled on for long time couldn't hear very well - not answered)

The situation with the negotiations is not easy at the moment.

How can we reach the soul of these people, how can we enlighten them?

I just received a message from IAEA, which is disheartening.

We have no answer. In just past few minutes. How do we work, how do we see?

How do we break up these barriers?

The people we put to lead are themselves- lead by others,

To the confirmation of their own lack of existence.

Q: Will a deal by the UN atomic watchdog, on replacing the cameras help?

K- We have a big problem in Iran - a very big problem.

This is part of the discussion, do we accept, and replace the cameras?

This is the discussion, that the Russians have brokered.

What it is and what I raised. You got to understand. We see things in different ways.

It's a big concern for Iran. I have risen that in the discussions

Israelis are using the UN cameras to identify our people, pressurize, and sabotage.

We have a big problem with UN cameras.

UN cameras are positioned inside all sensitive areas,

Supposedly to watch, that Iran doesn't do anything.

But the Israelis, which IAEA directly feeds all the videos to,

Identify the staff, and then they are pressurized.

They are cajoled, they're bribed, they work on them. This is our problem.

The problem is not IAEA watching (the reactors)

Israelis are using the IAEA cameras or recruiting -

Or creating damage within the structure of the Iranian nuclear industry.

This is unknown to the outside world

I don't see any way to solve this problem, and you have hundreds of people,

They target sensitive people, and then work on them. This is part of our problem.

It's not objecting to cameras watching,

It's objecting to the use of the cameras by Israelis,

They are identifying the staff, sabotaging negotiations, T and all sorts.

It's not just the cameras, it's the application and how the information is used

Q: We seem to have a camera in many different positions. We also have this camera, our soul, which watches everything, its position is in each and every moment, and each and every action we take, we watch ourselves. ..

K- It's not to be watched, it's one watches his own self.

In China - they can pinpoint where you are within 10 minutes. It's the same.

It's the use of camera, and the abuse of camera.

It needs to be understood how we watch ourselves without a camera.

We become watchdog of ourselves.

In negotiations, you watch how lies are being told - how information is abused.

Q: With the problems in today's world - difficulties with the peace treaty - how is Satan working for this to happen?

K- What does that mean?

Q: What's happening in the spiritual level, this conflict between God and Satan?

What's happening in the spiritual world?

K- We are sitting in a position that most of us don't want to understand,

Or most of our leaders don't want to understand,

They are part of the humanity till their seat (of power) is gone.

It's not Satan, it's just they think they are above everything,

And they can go through everything (without anything happening to them)

For example is your president of Brazil - he want to abolish vaccine passport

What is the reason he got to that point?

Wasn't there an incident, they wouldn't let him into (a restaurant) somewhere

Nobody knew he was a president.

Then he realized that even at power of president (has limitations)

They said world leaders (WL) were supposed to be immune - don't need injections

This virus knows who the leader is - and it won't touch.

He was under the assumption, and the promises -

That were given - that WL don't need vaccination and they'll be okay

That they could go everywhere and they won't get infected.

Somewhere in New York he wasn't allowed in the building

(After that) he wants to abolish vaccine passport - he refuses vaccines

This is very clear how the finance world has become the Satan's and the rest of it.

We warned 2 or 3 weeks ago - that the leaders, don't need vaccination.

How come? It's not safe?

The world peace is the same.

The world peace is in the hands of these people

It has no meaning for them until it comes to their own homes - their own grounds

Until then it doesn't apply to them.

Satan of the man, is the man himself - nothing else

Satan is not created by God. It is created by man, for man,

Satan was create as a way to control the weak.

We don't have Satan's - Satan is manmade, by man, for man.

Q: How can we evolve towards higher levels if we are constantly faced with manmade "plan-demics" executed by greedy ego driven leaders?

K- Don't know. They think they are above everything, until they become part of it.

The minute these people get the seat of power,

Or when people say to them, "yes sir" the whole commotion of trying to do things.

We see more and more of it.

A major corporation has reported massive profits - out of this situation

One of the major corporations have reported a massive, massive profit, which has come out of this situation of .. Pl energy transfers, we all know what we are talking about.

He was very proud his corporation made so much profit,

With the death of so many other people - they don't care.

He says, we are going to make more profit next year - read the news articles.

We would like to see him - his family - and loved ones in next few months - years

What I say, very simply is, we would like to see him and his family and his loved ones, in the next few months and years.

How they have to stand the time of balancing of their own fields.

We don't see it - because we don't follow these people after they leave power

The biggest problem is, we don't, when these people who are in power, are in power, we see them, but we don't follow them.

When they leave the seats as chairman's, heads of organizations, WL - the rest of it.

We don't follow into the structure of their life, and you see how horrible they live.

What the things, happens to them, the things they go through.

When they are in power many things happen - much is hidden by them & for them.

You have to see what happens to these people afterwards

We see it now with Netanyahu, the Israeli leader, or ex-Prime Minister.

The way this guy was getting, energy by hate, by creating hatred, lies, deception.

What did this guy get from the deception? Just the feeling he can do.

It's interesting because some documents have come into the negotiations

4 -5 years ago we approached Netanyahu for peace talks - through Americans

If you remember 4 or 5 years through our connections in American security we approached Netanyahu, for peace talks with Iran, to start a dialog.

He waited a week and few more days -

And he said, "I will negotiate with anyone but Keshe, because he'll get his way."

He used KF reactors in his design to promote Iran has a nuclear power

Then we realize why, he has used KF reactors in his designs to promote Iran has a nuclear power.

That's why he cannot talk to Keshe - he lied and cheated about Iran having bomb

That's why he cannot talk to Keshe, because he has used his space reactors, by lying and cheating, as being a nuclear bomb Iran is developing.

He openly has presented it. I have shown this picture before.

He cannot sit at table - when he create so much pain and fear to millions people

He cannot sit on the same table and negotiate with us, when he has used us to create so much fear and pain to millions of people in Iran, and all the hatreds we see.

Why this man has such a behavior?

Why has he used the KF reactors in presenting to the WL as a nuclear weapon?

Through his actions he turned world governments against Iran

He actually used the design of our nuclear reactors for space T.

How evil this guy has been.

He fooled the other nations into accept Iran as developing a nuclear bomb

He cannot look in your eye and negotiate with you, when he has used your T, your reactor to fool the others, into accepting that the nation is developing a nuclear bomb.

It's unbelievable, that these people at the point of power, can do such things

We are planning to take this into court in Israel against Netanyahu for deception

We are planning to take this into court in Israel against Netanyahu, deception, and being at the time, in a point of power,

And having absolutely an idiot in the White House as a president,

Or in a way, collaboration between the two leaders

This (false presentation) has become a point of sanctions.

Why do people at the point of power do such a thing?

No wonder he won't negotiate with us,

Because he used KF space reactors in the same picture - made it a nuclear bomb

(This has caused) 90% of the fear in present negotiations,

We wrote this in our communication with the 5+1.

How come the Americans have accepted this foolishness.

It's exactly the same pictures from our teaching,

The picture has been used by a WL to bring sanctions on a nation,

A nation which has no intentions of developing a nuclear weapon.

Even our own leaders in Iran were not aware of how we got to this point

We worked together to create a condition of peace - demented guy twisted it

You as KS work with reactors, we worked together to create a condition of peace to show the T and a twisted minded, what I call, demented fear driven guy, has used our T.

Same thing happened when we got the Nobel Prize

It's literally, I went through when I saw these pictures, in the same emotion as the Nobel, when we got the Nobel Prize.

Two of most demented leaders - became a cause for sanctions on Iran

When he saw, what really was about him, but what he brought to me, how my T, how a reactor, which I developed to bring peace for humanity, has been used by 2 WL, most demented leaders we've ever known, and it has become a cause of sanctions on Iran.

We cannot undo - how they misrepresented our work

It's absolutely, we cannot go back. We cannot go back. We cannot change how our reactors are used. Our work, as us as KS, is used.

IAEA has a problem with this picture (Netanyahu showing reactor)

Because it's on the table nobody can deny it anymore.

Biden has a problem with this picture,

Because his team has to go back and say, Trump had trumped the whole nation.

This is part of our problem - than you understand how difficult the job is for KF

We worked on trying to bring a peace program, -

**We developed a space program, and just look at the picture.
A WL lying in public - to bring crimes, bombings, killings (to Iran) by cheating.
You all know this reactor, it's a copy of the Iranian space reactor
This picture shows Israeli flag - brings shame on the flag and the nation.
Your space reactor - and just look the way they show inside it.
Some of you tested and opened this reactor - we've shown this structure
They are using our T in a way - to create a condition of fear.
They call it, "designing a nuclear weapons designing of Iranian .. dissemination."
If you go back and look - some of you KS working in the lab - have seen it.
This is the reactor you worked on
My knowledge to bring peace - has been used by 2 of the most heinous man - WL
To bring sanctions and killing and dying of children in Iran**

This is why we take the love of God from the Tribe of Moses

This is why we take the love of God from the nation of, not the nation, from the tribe of Moses.

When I see these - as the inventor/developer-how they used it to bring suffering

When you look at these, and when I see it , as the inventor, developer, and I see what I brought, and the purpose, and what has been made to be, and brought sanctions, and has brought hundreds of thousands of people suffering, (2:46). with the lying and cheating of these people.

(Strangely) the Belgium's passed this to Iranians - to say I am an Israelis terrorist

And the beautiful thing about it is, the Belgium's have passed this to the Iranians, to say I am an Israelis terrorist.

They all lived in my home, and sabotaged everything from inside, lies and cheats

All work together to bring the most beautiful T - to be the most heinous.

Lining their bank accounts and men in their bed.

Now you understand when I say, I am in ashamed to be in the clothes of man.

It is not easy when you face these things and you have to fight to overcome a lie

(Look) how proud these people are to be part of this (Trump & Netanyahu hugging)

What these people have brought to us.

It's a shame for us to see how our T - to see what it has been put to

This has brought a big pressure on IAEA.

These pictures have brought mayhem in IAEA - in the past week

They do not know how to handle this.

How to work with this? How can they go back and tell nations, they accepted a lie.

So IAEA is doing its best to cover this up

And the Americans are running rats from it.

This picture is of a murderer, a terrorist -

And most evil man I could ever known to exist in the time of my life.

Where he (Netanyahu) deliberately went out to do such a damage.

Tomorrow morning in negotiations, these things have to be solved.

Americans don't know how to handle it.

**The Americans, the Biden organization doesn't know how to explain -
This to the world -that they have been cheated.
IAEA is trying to distance itself as far as it can, from this position.
And what can we do?
We teach the T as messengers of peace, for you to learn how to go to space.
And we get the 2 most evil men on this planet - 2 of them
Then they're celebrating- further on this video - you see the 2 devils
What you call Satan's - hugging each other under the American flag.
(They say) "we lied, we cheated, how do we share the loot," -
by selling weapons to the Arabs.
This is where we have the problem, this is where we find pain in the T
I cannot find words to describe it, to explain it,
But how do we, how do we explain this to our people.
How can we explain this to people, that a tool for elevation of the man,
For science and T, has been used the wrong way.
And deliberately, and they are celebrating with each other for doing it.**

Q: Those leaders, those countries who are superior, is there any way we could take that superiority away from them, that they don't feel the arrogance?

K- Elevate their soul, elevate their soul.

Q: Apart from that, is there a quicker way.

K- When we say we take the love of God from a tribe, (2:56). it means we give it to them, but their soul will not accept.

**It's not punishment by us- they punish themselves - They block receiving
When we say we take the love of God, it means we give, but they cannot receive it,
because they punish themselves, they block receiving.**

It's the same with WL they don't understand - till it comes to them

**In Iraq - Saddam - used to come to weddings - take the bride on their wedding
We used to have close friends from Iraq, and at a very high level, before, when Saddam was in position of power. And the things they used to tell us, is that people used to have weddings in hiding, from the fear of Saddam and his sons, what they used to do, come and take the brides on their wedding.**

**Then we saw what happened to Saddam - he himself hid underground
What he did to other people - came back to him - they live that cycle
How long do they hide under that ground - every step they might be found
We've seen this (cycle) again and again.
You see,- we can't do much - but they do it to themselves**

**The reality is - what happens to these WL after they do these things is another point
Where is the reality, and what do WL do with themselves, is another point, after they do these kind of things.**

A couple more generations there will be no sign of anyone following Moses
What we see in the next couple of generations there will be no sign anyone, who will follow Moses. A couple of more generations.

**Because they become enlightened to the truth
And the way they were setup by their leaders
People used to hide to call themselves (Jews),
This time they will openly (freely) walk away from it.
The same will come to Vatican and the other (religions)
Where the people see the truth about how, and what the reality is.
By the end of this century there will be no Jews left.
Not by elimination - but by choice not to be.
(Only) the name of Judaism will be on paper - soon it will come off the paper
We don't say the end of a state,
We call it elevation of the soul of those who understand it - they walk away from it
How does every Israeli feels when they know he is such a cheat?
How do they feel seeing these pictures by the leader - children dying with sanctions.
This is the way they make their own people to walk away from their own belief.**

Q: My wish is this lie of the century will come into light as soon as possible.

**K- It is in the light. It's on the documentation to IAEA,
This picture is on the table of 5plus1 negotiations**

Q: I hope it will be in the mass media.

K- No they won't allow it to come out

It's on BBC, it can't be more mass media than BBC. You understand?

But connecting it to where it comes from ...

This morning I had communications with IAEA in the background.

They don't know what to do, they say, "we leave it, we can't do anything with it."

IAEA offices are in the shock, because they supported it.

Q: We've been there before, not so far distant past. They cooked up all that rubbish about the weapons of mass destruction of the Iraqis. They went in there, killed a few million, and they said, "oops there was a flaw in our intelligence." (3:02). They can simply do that if they want to. The UN was involved in that occupation, and destruction of a nation. Nonsense they built up, just exactly like Trump and Netanyahu, built up about KF reactor, which is supposed to be the most important piece of T in the history of mankind. They can easily revert everything back if they want to, and bring into the open. And say, "oops we made a mistake, somebody told a lie." And they always have a sacrificial lamb. They wouldn't care about Netanyahu and Trump.

K- You know what the Americans are doing.

Oh, this is part of it, this was not all of it. You understand?

When you go to the conference in Vienna you see a camp of reporters on the side

These reporters are told what they can record,
They are told what news they can send back to their headquarters to show.
We have the Iranian channel - everyday you go there - they are there.
It's the usual what do you call - celebrity show.
They are only there to wind it - just to say that something is there (but no details)
Even our own Iranian television channels are not prepared to bring it out in Iran.

Q: Shame on them

**K- This is .. (Mr. Keshe cries a little) .. it's like a cat show. You know the cat walk?
That's all it is.**

**The American negotiating team has only sent 2 or 3 to Vienna, rest in London.
When we can bring the Iranians on their knees - then we fly everybody in.
Somebody in the chat says, "tell them to visit the KF Exhibition center in person .
We already done that - we have prepared that.**

They are fully aware of the what do you call it - the structure.

Thanks to the KF team in Linz Austria.

**We have made everything ready for IAEA visit to the Exhibition Center
They've come, we've been told they (IAEA) has already come - at night
They have visited the exhibition center in secrecy. it's very interesting.**

American and European scientists were allowed to investigate our T in Linz

**We had the report that while the (first) EC in Linz was closed down (due to Corona), the
Americans and the European scientists have been allowed to go in, (3:06). and
investigate our T.**

**The exhibition is set completely to show the diversity in the technology
IAEA have been there - like thieves in the night
Ashamedly we have KS who work with them.**

**Q: Is there a way we can take away those arrogant nation's advanced T? Delete
them somehow. Once they don't have them, they will become humble.**

**K- Didn't it happen to us, as the Persian Empire? And now we've become humble
They see our humbleness as a weakness - this is the problem**

**At that time - before the Persian Empire became an empire -
Our leaders did the same to the other nations - there must have been atrocities.**

Q: Yes there have been,

**K- So have we matured for 300 years not crossing our borders.
How long do we have to wait for them to mature?**

Q: We need a catalyst, I don't know how.

K- The catalyst is the new T - but the time for it - starts from next Tuesday.

Q: We wish from our soul.

K- We know from our soul.

**Everything is under the control of what we call, "incompetent people" -
Who (have to) reach to the point.**

Whatever man from this planet needs to survive in the space - is under this roof.
This is the first time we show the Horizontal system in public.
In this machine I can grow your leg, I can change your heart.
Next to it you see the Brain system - the Vertical S - original EU for dense plasmas
Everything man has strived for thousands of years - is gathered under this one roof
There you see the space reactor in the center - the one which Netanyahu has used

Q: Why don't you put the negotiators in the EU before they sit for negotiations
Like when you go to the airport they put you through scanner units to check you.

K- Check their brain for the soul.

R: Maybe they need to negotiate with just their souls instead

IAEA has been snookered with what is on the table - why sanctions on Iran?

At the moment, IAEA has literally been snookered, with what is on the table of negotiations and why the sanctions on Iran.

One you make a doubt and can strengthen it - you bring doubt on the rest of it

Part of KF job is not to create a doubt - but show the facts

Mr. Grossi head of IAEA is at the moment - on the run with this.

He's got to answer to Iran, why has he supported this

Why has IAEA has supported sanctions on Iran - when they had no proof

Why did they rely on the lie of two presidents.

They literally do not know how to handle this situation.

This lie has created the biggest problem now in the negotiation

It's not the negotiation prior to 2015.

It's the new sanctions brought because of this picture by Netanyahu to Trump.

This is the biggest problem. This is the biggest problem for us.

With our document on the table all the sanctions are irrelevant,

But the Americans don't want to accept it

I will read you part of the text of this document we presented to IAEA

It says, "now who has fooled who? Iran's new advanced nuclear space T, has become weapon of, weapon T, by misrepresentation and deception."

For the Americans to confirm that they have been deceived will be hard

They'll have a big problem to sell this to their nation.

That Iran's new advanced nuclear plasma T is a space program development.

The system developed is to allow man to travel in the deep space,

To produce any material he needs in space, without returning to earth for supply

The biggest problem is for Americans to confirm that they have been deceived.

A nation this big with their president, to confirm that they have been deceived

It will bring a question mark on the other decisions they have made.

At the moment we are in a breaking point with IAEA over this document

Because this makes the sanctions absolutely ridiculous.
We want this to be opened up.
The American have to answer why they placed the sanctions on a lie.
Why didn't they prove it - why didn't they check their sanction policy.
It's amazing - how you as KS - sit in the center of the negotiations.
This is the fear they have - that the KF and everything will go public.
Now you can see how our T and KS who brought their reactors to Italy
How they are twisting it and making it into a weapons - by the nations who abuse
It's the lack of knowledge by the others - about the work of the KF

I see myself as responsible for every suffering in Iran - my T used this way
I see myself responsible for every suffering in Iran, when my T has been used this way,
sanctions added to, then I am ashamed to have another person who lived with me,
sending it to tell them, the way it's done, by lies and deception.

The fact is, how alert do we become - so that our T is not misrepresented.
We promote peace through the same knowledge.
They used our knowledge to create sanctions and pain.
Let's see what comes up and how we succeed in these works.
Hopefully we'll find another way to enlighten, ?? for next time, or next generation.

411 KSW Dec 16 , 2021 key phrases complete

SUMMARY:

ENGLISH TRANSCRIPTION: proofed 1x

(:20).

K- ... In the past few weeks (:22). we keep on expanding in a very deeper way of understanding the process of creation, and how we as a human race have missed, and what we are going to miss, and what is about to happen to us in different dimensions (D) and dominion of the creation.

One of the biggest problems for transmutation and transportation (T&T), is not carrying the whole of the information, or the whole of the energy package. In the coming time man will learn like we have the RNA and DNA, in the physical life, M fields, plasmatic M fields have the same. It's unknown to man, and in time as man becomes to understand it, will understand, that M fields carry not only field forces of positioning, that it gives them the structure of the physicality of existence, but on the same length, they carry the memory of what it is, where it comes from, and where they go to.

M field memory of the field themselves, is unknown science to humanity. It's something we never knew, we never considered, but in the time, when we come to be transporting and transmuting, we need to know. When we send the physicality, where is its memory? What is it going to be at the end of? Understanding of the, what we call, the present time,

the RNA, the information part, then the physical part, which is DNA, becomes part of the game to be played for T&T. Which means in the new system that we see, (:24). for example, the Vertical Enhancement Units (VEU) which are getting developed in KF, we can transmute the physicality, the D of the fields of an atom, but when it comes to the other end, how do you place the cell of the liver in this position, and not in the brain, and the cell of the brain, to know where to position itself, and not in the kidney.

This information carrying part of the plasmatic field is an unknown knowledge to humanity. In the coming time as we teach more, we'll teach you about the RNA of the M fields. How you transport it, how you transmute it, how you bring to make the plasma of the physicality, and the PI of the information, simultaneously carry the span of the U. You get there in the D of physicality, and everybody, how to put this PI together to be a sign of a human.

It's not just carrying the fields, it's carrying the emotion, carrying the understanding of the structure. Carrying, in a way, it says, I am a cell for reproduction, .. for conversion of the environmental energy into a physical D. In this atmosphere there is no air, is there a need for me. In this atmosphere, this condition, there is no liquid, do I need to adopt, shall I show myself, or do I become part of the memory bank of the PI, that next time, when this PI travels into another D, and there is a liquid, I can survive in.

The RNA in the .. knowledge of the M fields, (:26). It's hidden, but very apparent, once we understand the position of the GM field of any entity. What we call the line of order, the line of communication within the structure of the body of the man. This is vital for us to understand, that when we land on a planet, which there is no need for an arm or leg, the understanding of the emotion of the PI of the physicality, and emotion of the PI of the STM, decide what shape fits you, befits you. How other creatures, how other forms of life have managed to exist in this environment. Or what do I need to exist.

I go back to the memory as a cell of the physicality, in the RNA of the information, because there is no DNA of physicality, and I say, "I need a system," to survive to absorb the energy of this planet. This position in time and space, this galaxy. The RNA of the M fields is sacrosanct in the D of understanding the T&T in the deep space, even though on this planet it might be easier.

Nowadays we pick a phone, we send an information, but we cannot send the emotion through the telephone line. We can express our emotion on the line for the others to understand, and even if our emotion is a sadness, they might read it as a happiness, even though, (:28). our emotion inside is entangled in joy, they might read it as a sadness. In the D of the PI T, understanding the T&T of the fields of the U, there cannot be such an error.

In this process, the mankind will come to understand, that the PI T of the .. deep space travel has to be understood in the emotion of the fields of the STM, not the emotion of the physicality of the man. Where the emotion of the fields, or what we call, the RNA of

the structure of the T&T of the fields, of the creation will behave M, stronger part in confirmation of the existence, at the point of manifestation.

If and when the mankind be able to see the field flows within the structure of the plasmatic fields, he will see these lines of the RNA of the M field, of the line of information, the line of order, the line of T&T of the fields of the emotion will be carried for the first time with the entity in the D of .. transportation of the fields. Which means the fields, when it carries itself to arrive at a point of destiny (destination), it's got a ?? low (or load?) carrier, one is .. D of physicality, and 1 D of the information of the physicality, that in interaction with the new D, a new position is created.

RNA of the M fields is more or less, one of the last stages of understanding of the process of the creation. (:30). Once man unravels the knowledge, once man understands how to carry the emotion of the soul, man, or the soul of the entity, then the soul in T&T of the fields will bring that RNA to ?? and according to his need, according to its structure, will create the physicality of the need, at the point of the manifestation.

Humanity has got a lot to learn, humanity has a lot to understand, it's not just I take you from A to B. But carrier, I carry the emotion of you, in a different D of physicality and ?? impression, and existence. Mankind surely, at the beginning will fail 99 out of 100 times of trying. But if you could understand the .. RNA and the information carrying part of the M field, man will succeed to .. conquer the space.

Otherwise what we have seen with many races, you'll be taking refuge in UFOs, flying systems, and all sorts of things to carry the physicality and hopefully .. emotion of the STM in that D, will still be within the D of physicality of the man. But those races who have matured to the point of understanding the essence of the creation and Creator, and existence in all D, will know, they have achieved, what we call, "the holy grail of the creation," T&T of the emotion. Emotions of the soul, T&T of the information about the D of existence, (:32). and the emotion. Then you can replicate the man in any D in the U. With understanding, the same emotions, and the feelings, but it might not be the same at the point of arrival.

Mankind is about to become a true man of space, when he understands the process of the conversion and transmutation, of the information of the emotion of the STM, and not only the STM. One of the biggest problem for humanity has been to understand the strength of the fields of the emotion. We can see in the electrical systems, the place of the joy or sadness within the brain of the man, but these signals are not, they do not exist, they cannot be transmuted and replicated, if man does not understand, when it comes to the process of the transmutation of the STM, the PI of the existence, the PI of the source.

In the coming time, the .. transmutation systems, will be, and will carry this D, which means not only man will see the soul, but man will see the emotion, understand it, and it has international language. If you go back to the past teachings, I touched on this a few times in a very soft way. As I said, when you see another soul, when you see another entity in the depth of space, the color of the interaction, will tell you the emotion of the

entity. "My friend, I want to touch you, I want to smell you." (:34), I want to be part of you, I want to love you.

But these will come in the D of the interaction of the fields of you, and the fields of the entity, and in that interaction creates, .. space colors of interaction. The red, blues, the greens, are not the ones we see, the way we are used to. We have plasmatic colors, which now we have seen sometimes, even with the production of Gans's, but we never understood. We just call it the green one, and the red one, but is that red the same to my eye, and to your eye. Is that red, does it mean a danger, or does it mean it's life-saving, or does it mean a giver of life.

Why your CH3 are orange, and why your other H's are all in the same color bandwidth? Isn't that the essence of creation of the fields, I want to give you. Does this mean, that when we become passengers of the space, when we see these kind of colors, it means to us, the source of energy, you want to give me.

What happens when you see the D of the, when you produce the Gans's of the lead? Does that color, or spectrum of that color, when we see in the depth of space, does it mean that object, wants to take from you. It carries the emotion in respect to color, it carries the emotion in respect to existence. Mankind has to understand now, the color of emotion, the manifestation of its presence. When you get angry you grow red. Does it mean you are feeling the emotion in the D of physicality? (:36).

What you have to learn is the D of the emotion of the fields, in the essence, without the physicality. In the interaction of the fields, which is common in the U, the same. When you see a given life, given features, given color, it means, "I am in need." I am not stealing, but do you got anything to give me in the energy level? In another color it means, I want to give, I have so much, I have become part of the Creator. Do you tap into it, you say I have shown, I have this field strength in me. I am ready to take, but what you want back from me? How can I give you from the essence of my creation, what will you give me to stay within the boundary of the existence.

Mankind in the coming time will understand the biggest mystery of the life of the knowledge, is the understanding the field strength of the emotion of the Pl. Then you understand, why when you put the magnets on the table, and you add one more, it moves. It make the other ones move, because I am here to give you what I have, but we don't have, we haven't created the T, to see the field interaction, the color of between these magnets the joy, the happiness the accommodation, the position. "We do everything for you to find a place amongst us." Then you put the magnet on the table and it attracts the other ones. What does it mean, did you see the emotion of the fields before they interact. In the simple language of the man, we call it the N pole and the S Pole, (:38). we call it the entry and the exit, but how does that entry takes place, what is the emotion transfer between them. How many of you have created Gans's and tried to see if Gans's pull each other. If the energy of the Gans's bend? What happens if you put one Gans in another one, in the cup of .. replication of the fields, what colors are in there, what we call, in the liquid, the water which is in front of you.

We are not trained we do not understand, what emotions does the CuO brings, and .. the CH3 brings, who made them, how they were made. Were they made with the joy and happiness that the soul of the .. Gans is a happy soul. What happens when it goes in the bucket, when it adds its energy, to the field of the waters? This color of the water, it means it's not good for me. But now you pick any cup, and you put Gans in it, and you drink it. Because you haven't looked at the color of the emotion of the Gans. You have not learned the knowledge of the T&T of this field within your body, what it will do. At the moment, we are at the early stages, and we see some results and we follow it. But in the coming time the way we have trained ourselves with the night vision, we'll train ourselves to see the colors within the cup. It might be a color, which is good for you, but not good for me. I don't drink it and hope it will become good for me.

This is the part of the knowledge, the RNA, .. the information carrying part of the PI, which has been unknown to man until today. Those who will understand, the races in the depth of the space, who can conquer this, will become those who can understand, (:40). and be able to see the emotion of the Creator, as they have tapped into the D of existence and understanding of the totality of the creation, not only in the M field, but in the emotion of the fields.

Blessed are the souls who get to the elevation and the position, that they can see these colors. A few races in the depth of the Unicose, have elevated themselves in the purity of the creation, that they have managed to reach this point. It's not far, when you become detached. It's not far, when you become detached from the emotion of fields of the physicality to the D of the emotion of the physicality in the direction, of the emotion of the STM. Emotionally you get excited, your heartbeat goes up. What happens when emotionally, the PI of the STM gets excited? Would it change his color, .. emotion, .. his position, would it change at all for you be positioning yourself and repositioning yourself for you to have a constant emotion of physicality, it denies you from observing its real true emotion. In the coming time, you will see the characteristics of the emotion, the strength of the fields of the emotion of the STM, in the confirmation of the existence, and carrying the correct information for the physicality to befit itself, (:42). in the D of manifestation.

In the past, mankind had no knowledge, now as we said before, you understand, you are responsible to find the source of it. You are responsible to understand how to double load the STM's fields, and the soul of the emotion, of the man fields, on the same track, then the field lines, carry the emotion of every cell of the body of the man. Otherwise you'll have a man with no emotion, even though the STM exists within it. Then physicality, by repossession of the both, the STP and the STM, because the information of the emotion of the soul, never arrived, or it's misguided, and its diverted to another position and time, and you have what we call the "cabbage" of the soul, not much, it's just there, waiting for the information to arrive, the information of the soul, .. of the emotion of the soul.

Humanity has got a lot to learn, but in understanding the way we create our systems, you can blindly follow, that one day you might understand. The whole purpose of the

teachings is not to be the man of today, that you go to the shop and you buy a telephone, and it doesn't matter what's in it, as long as I can hear it, say, hello, and yes and no to my dad, I don't care what's inside it. With the knowledge of the U, you have to understand every motion, and every emotion, and transmutation of the field of every entity, before you become a true man of space. Otherwise, as he says, (:44). "ladies and gentlemen, please fasten your seatbelts because we are carrying your physicality." Then you have entrapped the soul in it. The spaceships of the STM, is within the STM, and not within the physical spaceship of the man. Understanding the knowledge and T, is part of the T&T of the life. Part of the existence of the true life within the space.

We are approaching the point, where the man will understand, that in essence, every creature is the same, every fields of the soul of the creation is the same, but its the creation, that it changes in the D of the physicality. "I have created man in the image of Myself." Not in the D of physicality, but in the D of the fields of the souls and the emotions of the fields of the souls. The information, which carries within.

But man is so feeble that he thinks the Creator has 2 arms, 2 leg, and 2 eyes. I gave you the eye to see, but in the D of the STM, I gave you the field strength to observe, to understand the emotion of the seeing, and not to be, physically to see. In time, man will come to understand more and more, .. mankind will come to mature to understand the process of the creation through the true way of the life of the Creator, and not by the way man has chosen, (:46). the physical D. Maybe one day we'll become mature enough, we'll become in a way, complete enough to be able to reach the D of physicality's, what we call, M field information, and then one day, .. in the coming time, some of us, some of the human race, the children of the Adam, as you call it, which is the Creator, might become mature enough to understand the process of the creation.

We are approaching 21st of December, many of you have set life, to see the change, the manifestation of Mitra. Mitra has manifested itself in the dimension (D) of physicality millions of years ago. But in the D of the physicality of the soul, not in D of physicality of the man. In so many ways, when it comes to the time of what we call Mitra, it means the time when the man will start to understand the full process of the creation. Not only for man, but for the rest of the creatures of the U. It's .. the birth of the totality in understanding the love of the Creator for its created.

In coming time, many of you will endeavor to understand the process of creation, through understanding the process of created. But if mankind is to achieve through knowledge of creation, mankind has to walk away from what he understood about the D of physicality and life of the man, in the D of physical life, (:48). I made man in the image of Myself. ... in the D of the soul of the physicality (STP) and the D of his soul of the created, and the STM itself. Maybe one day mankind will understand the process of the creation, in true essence of it, and not by the dream of it. What will happen, the way it will happen, and the way mankind will decide for it to happen to itself. Many of you will come to understand the ... true process of creation through transmutation and transportation (T&T) of field strength of the systems. When we transport you from one Enhancement Unit (EU) into another, we don't transmute anymore your physicality. We have made

teleportation, .. the condition of transformation and transportation of the both, the fields of the plasma (Pl) of the creation, and the fields of the emotion of the Pl, which has created that emotion and that physicality, in the D of the emotion of the transportation. In a way, the RNA of the RNA, in a way, carrying the information of the existence plus carrying information of what it needs to exist at the point of manifestation, or detection.

In coming time we teach, in coming time we'll try to teach more, but for many of you, .. at this moment of time, all is important, is to see a UFO, to see you can fly, (:50). and then we talk about the rest later on. We leave it to our next generation to sort it out, because we have seen and we believe in what we see. I gave an example in the recent past, and I go back to it for you to understand the reason why I gave you it. You Knowledge Seekers (KS), and the human race would like to see a miracle, that the miracle leads, for you to understand, to see the light, to see a confirmation, affirmation of the possibility that by seeing the light, you'll see the light of the Creator. You see the light of the confirmation of existence, and this shall show my power, and what I can deliver.

As I explained, and there are a number of KS who can explain to you, I have made them to see the light, what you call the UFOs, when you ?? see the shooting stars. I never created the shooting star. I created the fields of the emotion of the soul, that the STP of the man, reads the emotion and calls it, "a shooting star." And we have made it possible that for 3 or 4 or 5 souls to see it at the same time. As we have a long knowledge of the common denominator field strength of observation.

For me to confirm the totality of the control, is that for every single one of you, and the rest of humanity, at the same time will see the same light. It does not matter, (:52). if you are at the North Pole or South Pole, if you are under the ground, or you are on the mountain. Then you will understand you all have seen the light, but has that light enlightened you, with the knowledge of the creation? That's questionable, or just happened, that even man in the deepest caves will see the shooting star, because we have created that impression through the STM, and not through his D of physicality. In a way, we have put you in a state of dream, and we control the show.

In the coming time, many of you KS will come to understand, that the teachings of the past, and what is going on now, was and is, to direct you to understand more about the process and the interaction of the fields of plasmas, in the D of the Gans or in the D of physicality.

Would all the Gans's within the same pot, decide one Gans should be elevated and they all give their energy to that single Gans. Would the shape and the emotion of that single Gans, in the D of physicality be the same, now that it has received all these energies. Today I have opened the rigma (rigmarole) of the life. How you can unravel this rigma, it's your level of understanding about the true level of creation. How far to what extent as KS, gather the knowledge of the past, (:54). to confirm the existence of the tomorrow, for their own soul, will become the biggest battle for every single one of you.

We have seen the Corona and the mayhem, which will come with it in the future. The strength of the emotion within you, will decide, if I want to be in this D, to be given, to be enforced to be given, to be conditioned for my physicality to live, to be here, to accept, the "to what can come to harm my physicality." In that process now, because of the realignment of the fields of the emotion of the physicality and the STM , and understanding the interaction with the STP, you shall decide, "am I taking fields of the energy from the U," with all of the, only the fields of energy, but the information carrier part of it, and what do I have to do, and what do I have to give, that create the emptiness for that to arrive.

Humanity has entered the point of what we call, "creation." The true essence of creation, the true understanding of the process of creation. Maybe, maybe one day, some of you as KS will reach the point that you don't need to seek any further, but you understand the process, and you shall see the light of what I call, the emotion ?? and RNA, (:56). of the fields of existence and your soul. At that point you are mature to see the light of the Creator, and with it become part of, as you have seen to become part of, because by seeing you have accepted to receive the totality of the knowledge of the RNA and DNA, both with information and physicality, of the existence from the source, from the point of creation.

The true essence of this comes, we reach, we are approaching what we call, Christmas. We all speak about the shinning star, the Star of David. Is that star, a true star, or was it seen by the souls and accepted by the sum of the totality of the physical life, of those who wanted to believe seeing the star. Then did that star, emotion and information carry the same emotion and information in every single person who has seen it, or was it just only for those who followed the path of Christianity?

Now the question of existence takes different shape. Is the Star of David the light through interaction of the emotion of the fields, of those who wanted to see interaction and emotion of the fields of the Creator, all within the structure of their own soul. (:58). The burden of knowledge, the burden of learning the knowledge, the burden of understanding the knowledge, is upon you, to understand the process of the creation of the information and emotion of the STM, that with it, that you can take that, and create essence of the source of communication, and emotion of your physicality, in any dominion, and position in the U, in the Unicose.

Then you understand how, we have lived amongst men for thousands of years, as we understood the process of the creation and transformation of the essence of the knowledge, and balance energy of the fields of the STM. I hope many of you KS will mature to this point very fast. What we call, the birthday of Mitra in coming days, is the enlightenment of the man. The birth cycle of the creation, as Mitra is amongst us, has been, and shall be, in the essence of the confirmation of the STM, not the STP of the man. Those of you who want to see Mitra with your own eyes, will see the light of it on 21st. Those of you who are expecting to see the physical D of the birth will have a lot to learn, as you have to convert D of the physicality from the source, from the ?? top (1:00). then humanity in one instance will mature.

The teaching of today is not for faint hearted, it's for those who are deep thinkers, who understood the process of the teachings of past years, and can manage to convert it, and complete it, with interaction of the fields of the man himself. As I said before, when we were teaching the physical D of the reactors and whatever, we needed 3 or 4 or 5 hours teaching. Now that we teach in the essence of understanding, one minute teaching, needs thousands of years of understanding. It's for you to decide if you have matured enough to understand part of it, or the totality of it, as you have learned to walk. Now you have to explore the ground.

Rick would you like to go for a break. .. we will carry on answering questions, because understanding the teaching of today is many, many thousands of years of contemplation. .. (1:02).

Proofed to here >> continue

>> BREAK <<< 411 KSW Dec 16, 2021 (1:10).

Q: Ed .. the ability to see the colors of the emotions of the RNA the soul .. Is that always the ability to see the color. .. I know it's not physically seeing the color, but you talked..

K- It's the emotion of the color.

Q: Can it be a feeling rather than a physical representation.

K- That's what it is. That's what we are talking about.

Q: So why did you call it a color? Is that ..

K- Because that's how you understand it. How else do you want me to call it? .. The human race has not managed to complete, that kind of wording for emotion of the color. Or color of emotion, either way you put it.

R: I have an example from early childhood. . . in childhood I had a (1:12). .. vivid dream of being out in space. I was encountering these colored beings and the blue ones ... they were the friendly ones. .. I could feel the empathy or connection,, love.. versus the red colored ones. that had the emotion of love attached to the color in that scenario. I don't know if that is exactly what you meant ...

Q: So .. as I go along this train of thought. Different souls as they develop into this ability to see this emotion, will they, will there be differences in, some will see it, some will feel it, some may hear it. I know I am using terms of physicality, but each soul will learn to sense it in a different manner, according to their own makeup?

K- Not really, because the way, I have explained this in a teaching before, you can go over it. The way we as humans know what the emotion of anger is, (1:14). and how we sense it, we don't' .. we feel anger, we feel the emotion of joy. To us that is what is joy.

This emotion is joyful. Now we have to learn the same emotion in the level of the STM. There is no difference, but in understanding, that you are living with a different, approach, more or less to the same thing.

So we got to learn what it means in a different U, "I want to eat you." Or you are delicious, I want to fall in love with you. Emotion of the soul, in so many ways, is similar, but in different ways, than the emotion of physicality. Because usually emotion of physicality has an attachment, and detachment, expectation. Where in the D of the soul there is no expectation.

Q: That's amazing.

K- You see when you love someone, you expect to be loved back. In the D of creation, or the soul, the love you give, you don't expect to be given back. But you know you receive it back from somewhere, not necessarily from the lover, but that gives you the emotion to give more. (1:16).

It's very hard to fall in love with the D of the soul, because it is a one track lane. Thank you. Any other question.

Q: I have a titanium plate in my left hand, can I use the Visual EU without problems. What advantages does the VEU have for my brain?

K- VEU is setup for a specific characteristics, and specific jobs. It's in the position of the body, the lower part of the body, it should not be effected with it, at all. It depends what you can do, what is wrong with your brain, that you expect it to fix. But these are a special systems built for a specific purpose. All the .. even the Body EU are not the same. We build them according to what we want them to do.

The 48 for Arizona (AZ) are built of 4 different characteristics to do, for different jobs. (1:18). It's not all .. just because it's a Brain EU, we develop them according to what job they are going to do. Maybe you need to sit in 2, combination of one and four, and somebody else needs combination 1 and 3, and (someone else) needs 3 and 2. That's why we bring doctors in and train them how to use, in each combination, and for what purpose. If you have a stroke, your arm and leg are damaged, you don't need a Vision EU. If you are blind you don't want to get your arm and leg working, because they already work. Or you have a problem with your Cataract, but you have another problem with your neural system of the part of the brain regarding the vision at the same time. The systems are setup for different applications. Any other question.

Q: .. Do we have the same intuitive equipment as the animals, and when are we going to believe that?

K- Can you translate please ... (1:20).

R:

K- What intuition?

R; intuitive equipment of the animals ..

K- Yes, brain.

Q: .. as we have 1 M hand and 1 G hand, would it be possible to absorb the energy of the U with the G hand, and transfer that energy with the M hand, if it is possible, please teach us?

K- We already do it. We absorb 80% of our energies from the environment, and most of it is done through our fingers. When you put a position of attraction and a position of repulsion, or 1 hand giving and the other one taking. At some point, focus to end up to be together, you create friction and create light, and then see what we do.

In ancient time, today's man has lost that capability. If you could hold your hand in a specific way, that you bring together the conflict of the fields, (1:22). then you can create a light between your hands. We've shown this, it can be done, it is very easy, but it takes a lot of energy. But you can tap into the universal energy fields, with the position of your fingers, and just receive that energy and create that light. But that light energy is not necessarily in the vision of the man, but it's in the essence of the energy of the STM, you will see the light through the soul.

It is one of the first practices that you will do when you become aware of how to use your soul, and confirm the existence. With the eye you don't see, but with the eye of the soul, and observation of the soul, you see, you don't know, where am I seeing a light, when there is nothing. Then you understand you reaching that point of maturity. The biggest problem with humanity is that he accepts it if it is a visual sense to him, or in one of his 5 senses. Mankind has to learn to transfer this, into the emotion of the soul, and then you'll see the difference, you will see different lights, .. different understanding, you'll feel different emotions, but you still see, to confirm the existence.

Q: .. come to the Portuguese teachings on Fridays, we miss you. (1:24).

K- From where?

R: They have a weekly teaching, apparently.

K- Yes, I try to go everywhere. I had a complaint from the Iranians yesterday. They want to transfer the teaching from Wednesday to Mondays ...

It's just having the time.

R:

K- I was yesterday in negotiations. It's amazing how much energy is wasted there. I was in the 5plus1 negotiation group. You see how much waste, sitting there, just to satisfy the ego. After a few minutes of it, you just want to walk away. It's not there to support humanity. It is there to support the ego of the few leaders. When you walk out of it you feel you've been in a chamber for 20 years, the energy depletion is amazing. It's not an easy .. way to do it, but it is the only way to do it, physically being present and doing things. At the moment we are involved in so many different directions and works, but somehow the energy comes, somehow you manage, (1:26). somehow you still find free time to do things, to be part of.

I go back to this because KS, especially in U Council supporters, the negotiations are running into a rough time. It's little light here and there, but overall we need a lot of support ... what I see from close quarters, it's going to fail. Because the ego's of our

leaders are bigger than what we call, ?? what can be delivered by one or the other. Yesterday in understanding, and the day before .. it drains you to see how collaboratively people are sent to destroy each other. Interestingly, is how collectively they agree to do the same. Demands unnecessary suddenly pops out, because we don't want to do, you accept, or we change something else ..

It's the responsibility of us to change the soul of the leaders and negotiators. We need a lot of support. I don't get disheartened, but I see the next step, the next stage, and what can be done and how people walk away, or how people create a condition for others to walk away, to confirm that they ?? won, are doing something. We see some light. (1:28) We have seen some positive results, but we still, there a long way to go. It can literally fail. We'll see after Friday or Sunday, how it will take shape further. But there are some small breakthroughs, but we'll see. We need a lot of support from all the KS, and it is an exhausting job to be in these .. to try to be, and trying to get people to see.

Q: .. The prophets of the past, despite offering good news, warned of difficult times, and apparently we are already in an era of limitations for human civilization. With PI science it opens a promising path for humanity, without any fatalism as indicated by the prophets. Question , if we don't align with the ethos of the U, and we don't get a peace treaty between the nations, can we enter into an era of cataclysms on earth, as a purge and correction of the course of human civilization?

K- The time of purging is finished. (It's) the time of maturity and understanding. What is very interesting to us, is the dossier submitted by KF to the negotiators, is very simple. I read from one of the pages. This is a long submission, which is in a beautiful hard copy. And what interested me, (1:30). and some of the people who are involved, is that ... just open it ... one day it will be published. We put into dossier of negotiations.

It says, Iran will share collectively, and develop new T with all nations. If agreement for sharing this new T is, .. is not reached with Iran on this basis in Vienna, Iran sees as its right to share the new space ?? and the space defense T, with any nation as it reaches its goal of, T in exchange for permanent peace.

This is a problem for world leaders, leading nations, to commit their nation to permanent peace, and we are very clear, .. we are not there to give what we call, "put conditions on sharing T." We are giving it freely, to the nations, if we don't reach 5plus1 agreements. And still to them, (1:32). is hard to accept, that they have to share T, because then they loose the superiority.

In another paragraph of the material which is with the negotiators. It says, Iran puts no condition for sharing and collaboration in sharing this new T and knowledge, with 5plus1 and other nations, to produce pure PI nuclear material for space energy and defense. This is again, another part of it, our message from Iran is clear, the Iranian nation and leadership, Iran is prepared to share openly with 5plus1, the full PI preparation, which means we produce nuclear materials at a 100% rate.

They cannot believe Iran is prepared to share such a T. When we wrote this document, when we put this document together, the condition was, that we share openly. It's hard for our leading nations to accept, that they have to become equal with the other nations in knowledge and T. This is the hardest thing, which I see, and it's totally unbelievable how some of the world leaders, and people who like to keep the superiority, do not want to be, do not want to sign themselves to peace. (1:34).

What is going to happen, what is about to happen, what is there to happen, is in the D of physicality, what I call, bribery of the largest scale, and all sorts of contracts, that we have if we do. What they don't want. If you are in negotiations you understand. 80% of demands from American's have nothing to do with nuclear industry. 80% of American government demands, of 5plus1, and the Europeans in the same way, is nothing to do with nuclear industry.

One of the major demands of President Biden, is that Iran does not supply any electricity into Iraq or Afghanistan from our main supply grids, to support the nations. This is unheard of. When we hear this in negotiations we just pull our hair. Iran as a nation supports other nations, cannot put electricity into nations to support. Nothing to do with nuclear industry. It has nothing to do with what we are there for. We have to oblige to get the sanctions removed. To help your nation, don't help your neighbors. How come France has agreed to help the Europe, (1:36). if the British Oil falls short of energy, taps into French energy system, because that with nuclear power, they guarantee. The same with the Germans.

But if Iran does it, it's a criminal, it has to be sanctioned for. I sometimes, when I look at the negotiators, I just cry. What the heck are we here for? We just give and give, for what? Not to do. ... we want to share the T, we are sharing everything. "No, you cannot share, because the others will be equal to us." It's an amazing construction of hypocrisy in ?? and a lot of other things. And it's not only the Americans, it's most from the Iranians. Give us this, give us that, we'll do this - this is my bank account, this is yours. Little achievements, but in general totally tying up a nations not to do anything. What does energy supply to your neighbors, which are in short of, got to do with negotiations on nuclear power, or what they call nuclear weapon. Any other question.

Q: What is the fastest way, (1:38). to converge the STP with the soul of the nonphysical part of our being. What is the secret key?

K- Die (they laugh ..) ?? what I said that, was a funny answer to it, but it's understanding the trust. I mean that's the answer to the human being today. But we call it sacrifice, we call it, martyrdom, all sorts of names put to it. But in reality is to understand the work and the connection.

In the ancient time, ... there were races for example, that could retract their fingers and extend them. They could retract and extend their arms when they needed. For the .. saving and not taking what you need from an environment, or for protection, or whatever. ?? of course they had control over the emotion of the STP. We all can do that, it is not

hidden from us. We just ignore the access to it. We just have created a blockage, that we don't hear. I said, this is like a bell. You know when you live near a church, (1:40). and the bell goes every hour, "ding dong" .. and you hear it. When you live by the church so long, you don't hear the bell anymore.

Your STP and physicality have decided, " I am ignoring it". But accidentally you hear the lunch ding dong. It's the same. We have decided, not to listen to the ding dong of our soul. Now we want to wake up, there is a lot of clogged information in-between, we need to dust, to be able to get to it, and then we'll see. It's not that it is not there. We have created these barriers for not to hear it. Not to confirm its existence.

Unless you find a ladder to the Creator, in a different way, or to your soul. If you go to Vienna the main church in the center ... they put a ladder on top of the church. It's the steps to the Creator, how far you can go with it. Then we listen to it every night. From the church you can find your way into the depth of the U, to the Creator, but not when they give you a .. physical ladder. It's us who have created that steps of that ladder, for ourselves over time. We made this ladder bigger and longer with more steps. Where you actually, when you go the full length of the ladder, it's twisted and you come back to the same point, (1:42). where you are. It's a funny way, because you don't see the end of it, but you don't see, that the end comes back to you. It's us who makes it longer or shorter, according to our way of belief and understanding.

It's very much what I call, Tenerife camel ride. In Tenerife ... they all coming for a camel ride, you see them going into the mountain. But what you don't see is that they just spend about 2 minutes in there, and then they come out. They've got a closing on the mountain, that it goes around a post and comes back out. A camel ride, you think you are going to go there for a long time. It depends how we made that hole, and how big we made that loop. We have denied the knowledge to ourselves, .. the affirmation of the existence and communication to ourselves.
Any other question.

Q: .. in the spiritual world many people talk about opening up the Third Eye, the pineal gland, Could you shed some light how to open our T Eye?

K- Isn't the pineal gland another way of, they are trying to tell you, you get an access to your soul? (1:44). We don't hide, and duck and dive, we just go directly for it. Isn't the T Eye your soul, but you become aware of totality, your Creator. In different time, in different generations, different ... intellectual understanding, the same thing has been explained in different ways, so people could think, understand it, and follow it.

Now with the teaching of the KF there is no ambiguity, it's there, and you can find out where you try to hide it. Why do you need a T Eye when you have access to your soul, and if you look at the position of what they call the gland, and look at where we tell, your soul is. Not very far off, is it? Because people up to now, couldn't understand the STM is within the structure of the man. So now it becomes the pineal gland, the T eye or whatever. If you manage to get access to your soul you can call it anything you like. ??

??? teaching it. We are enlightening you to understand, to find it yourself. Mankind has not been kind to himself, (1:46). and denied himself many, many things.
Any other question.

Q: ... Someone told me the sanctions on Iran have been dropped, is that correct?

K- I don't see it, if they dropped it, go and collect it. No sanction has been changed. They are talking about making it tougher. Or they are going to do this or that. It's hypocrisy in negotiations.

R: they'll be going on for another month is that true?

K- .. Till Sunday night, and then we'll see. Most probably people will return back to their countries, because after Monday next week it's Christmas and New Year most of the European negotiators go home for their holidays. We are having the Christmas Eve on a Friday. The negotiation will stop on Sunday night more or less. They'll return back to their countries for consultations with Christmas and father Christmas, and then they'll come back after that. If it comes back. There is a very high possibility, that they might break up. We are back in tomorrow ... to see how we can push the whole structure.

It's very difficult, (1:48). these negotiations are very much one-sided gun policy, shotgun policy, I call it. And the Iranians are not helping it much. I will be back in ... tomorrow, the last stage. We'll see. We still need a lot of support, it needs a lot of understanding, and the reality is the complexity of the sanctions on different organizations, different people who are running them, is one of the problems. But our .. Iranian diplomats are not very seasoned diplomats. They are not mature in negotiations, and that's one of the problems with the Iranian team. The Americans are sitting in London .. not in Austria, and both the European teams, the British are extremely seasoned. They understand how to play. Iran ... the Europeans and Americans play with .. seasoned diplomats. Iran doesn't have that. We have a government who has been in power for a few months, and ?? uncles, and son-in-laws, .. and they're put in position to negotiate, to make sure the what do you call it, private bank accounts are looked after. (1:50). It's a very dirty game. Extremely dirty game.

Any other question.

Q:

K- Thank you Christmas is next week.

I call it, the birthday of Mitra, European version. We choose 3 or 4 days different.

...

it's going to become shorter because Mitra has come, 3 or 4 days difference. So we'll wait and see. In a way, the birthday of Mitra is celebration for, confirmation of the world of physicality for mankind, and the world of creation.

Any other question

Q: Is it best to try to receive the fields at dawn when the birds are singing?

K- Would you like to be onboard of a plane and dawn will be all the time, 24 hours a day.

R: The birds are always singing (1:52).

K

R; Wasn't that the first thing they do to create an oasis in desert bring birds in, or when they create an oasis. ...

K- I don't know. It just attracts it, because it's a source of water, .. life. When you have an oasis you have a water resource, so anything flies over will smell the water. The birds and beasts.

We were watching the, trying to do some work in Iran with building the space center. The videos of the different land which is has been offered that the space center can be built. One of the ?? beautiful, where you see it is literally desert, and there is one waterhole, and you see the gazelles and all the animals know where this waterhole is, and they come to drink and go. You see them in line for one waterhole, which has been there for centuries, is where all the animals know, they come and just drink and go. That's a normal way, in the middle of nowhere, you see them. ... Man will find, even in the space you'll find the places where the fields are, to our "tastes" as I call it, and we just go there to absorb tastes of the fields, that it could taste of the banana in the west. And you say, "oh, in the memory bank," in our RNA, memory bank M field, it says, this was the taste of banana on earth. (1:54). But will it raise the same emotion in the D of the soul. Is a different matter.

Q: Mehraez, ???? somebody said law. I think what you said today we don't have law, .. order

.. for me that's already clear ..

(1:56).

(1:58).

(2:00). ..

K- Do I have a problem with bandwidth or is it Mehraez .

Q: If .. if I do it with a mantra or .. just giving from my soul what I am pointing to. .. Someone asked is there a ritual for giving from my soul?

K- No we never create these kind of things. You've got to go within yourself to find it. (2:02). We never made holidays to be on a Thursday or Monday, temples to worship towards, we never do anything to create that kind of ritual.

Q: short cut ??

K- There is no shortcut, till you understand it

Q: It means we have reached the point of maturity of our soul if we can do it.

K- Yes, more or less .

Any other question.

Q: Salomea ,.... ..

K-

Q:

(2:04).

(2:06).

.. Humanity do not need leaders, humanity needs to help each other ...
We have created separated minds and hearts ...

Please be wise for the future of our children, (2:08). we live in abundance. because the U is abundance, never scarcity, and we create material, energy.

(2:10).

(2:12).

Much love Mr. Keshe.

K- Thank you Any other question.

Q: Dean, (2:14). ...

K- What do you mean?

Q: I think many of us ?? from when we were young, and it traumatizes, whatever it is, for many people. So that field strength gathers within physicality , and this trauma can then be carried forward, and the PI grows, it's an active ?? In the first instance it traumatizes the person ... then that person attains authority and position, and then they could use it to reposition a nation and beyond. When does that ?? person comes to a position of enlightenment to realize the position stance they may have taken. (2:16).

R: went on a little too long

K- No it's just that the way it appears. We respond to some questions that are coming from the other side (negotiators), that why I moved out. The situation is not easy at the moment. How can we reach the soul of these people, how can we enlighten them? I just received a message from IAEA, which is disheartening. We have no answer. In just past few minutes. How do we work, how do we see? How we break these barriers up? The people we put to lead, themselves, and are lead by the others, to the confirmation of their own lack of existence.

Any other question. (2:18).

Q: ..will a deal on the UN atomic watchdog, on replacing the cameras, so that , will this help?

K- We have a big problem. In Iran we have a very big problem. This is part of the discussion, we accept, or replace the cameras. This is the discussion, Russians have brokered. What it is and what I raise. You got to understand. We see things in different ways. It's a big concern for Iran. I have risen that in discussion. Israelis have used our people, using UN cameras to identify, pressurize, and sabotage. We have a big problem with UN cameras. UN cameras are positioned inside all sensitive areas, supposedly to watch, Iran doesn't do anything. But the Israelis, which IAEA directly feeds all the videos to, identify the staff, and then they are pressurized. They are cajoled, they're bribed, they work on them. This is our problem. The problem is not IAEA watching it. Is the using of the cameras in IAEA, for recruiting or creating damage within the structure of the Iranian nuclear industry. This is unknown outside. (2:20).

I don't see any way to solve this problem, and you have hundreds of people, and they target sensitive people, and they work on them. This is part of our problem. It's not objecting to cameras watching, it's objecting to the use of the cameras by Israelis, in identifying the staff, sabotaging. Negotiations, T and all sorts. It's not just the cameras, it's the application and information use.

Q: We seem to have a camera in many different positions. We also have this camera, our soul, which watches everything, its position is in each and every moment, and each and every action we take, we watch ourselves. ..

K- It's not to be watched, it's one watches his on self. I was talking to some people ... about china, (2:22). In China they can pinpoint you within 10 minutes where you are. It's the same. It's the use of camera, and the abuse of camera. It needs to be understood how we watch ourselves without a camera. We become watchdog of ourselves. In the past couple of weeks, when we do the teaching, there is a lot of pressure, because we are live on negotiations, .. it just takes time, you watch how lies have been told, and what lies have been told, and how information is abused.
Any other question.

Q: ... Rafael, .. (2:24). ...

K- can you translate what he is trying to say. Rafael.

Q: I was trying to understand his question. .. with the problems we are going through today in the world with the difficulties with the peace treaty he is asking a religious question. How is Satan working for this to happen? Where

K- What does that mean?

Q: .. (2:26). What's happening in the spiritual level, this conflict between God and Satan? Because that's what it seems is happening today with this problem in the world we are going through and with this negotiation, it's hard to get a peace treaty between them. What's happening in the spiritual world?

K- It's .. We are sitting in a position, that most of us don't want to understand, or most of our leaders don't want to understand, they are part of the humanity till their seat is gone. It's not Satan, it's just they think they are above everything, and they can go through everything.

The example is your president. I was in the American teaching on Sunday ... it was explained by someone in American Teaching, that the Brazilian president has refused or .. abolished the vaccination book and passport, they call it, am I correct?

R: Yes that is correct, but the problem is, he is going through here, is that this power is with the governors of states, not with the president. For himself he will not take the vaccine and he's against the vaccine passport.

K- He abolishes, denies the vaccine passport? (2:28).

R; Yes.

K- Yes, but do you know what that means? What is the reason he got to that point? Wasn't there an incident, they wouldn't let him in somewhere. Nobody knew he was a president. or there was a confusion a few days before that ...

And then he realized even at the power of president, there is no need, because he was supposed to be immune. This is what we said in the other teachings, that the world leaders are immune from vaccination. They don't need to take it. This virus knows who is the leader and they won't touch. He was under the assumption, and the promises that were given that world leaders (WL) don't need vaccination and they'll be okay, and they don't take it. But they could go everywhere, they won't get infected. But I think he was with his son .. somewhere he wasn't allowed in New York if I am correct. Then when he went back, he said, because he was given assurances, that he won't get the virus, he doesn't need vaccination. Now he abolished it.

This is a very clear work, how the finance world has taken, and become the Satan's and the rest of it. We knew about this, we warned 2 or 3 weeks ago, that the leaders, mayors, high ranking civil servants don't need vaccination. How come? It's not safe. The world peace is the same. the world peace is in the hands of these people, until it doesn't come to their own homes, (2:30). and their own grounds, it has no meaning for them. It doesn't apply to them.

Satan of the man, is the man himself, nothing else. It is not created by God. It is created by man, for man, and it's the way to control the weak. ..
We don't have Satan's. Satan is manmade, by man, for man.
Any other question.

Q: How can we evolve towards higher levels if we are constantly faced with manmade "plan-demics" executed by greedy ego driven leaders?
K- Don't know. They think they are above everything, until they become part of it. This is the biggest problem.... these people the minute they get the seat of power, (2:32). or the minute some people say to them, "yes sir, yes sir." the whole commotion of trying to do things. We see more and more of it.

One of the major corporations have reported a massive, massive profit, which has come out of this situation of .. Pl energy transfers, we all know what we are talking about. He was very proud his corporation made so much profit, with the death of so many other people, they don't care. And he says, we are going to make more profit next year. Read the articles.

What I say, very simply is, we would like to see him and his family and his loved ones, in the next few months and years. How they have to stand the time of balancing of their own fields. The biggest problem is, we don't, when these people who are in power, are in power, we see them, but we don't follow them. When they leave the seats as chairman's, head of organizations, WL and the rest of it. We don't follow into the structure of their life, and you see how horrible they live. What the things, happens to them, the things they go through. Even when they are in position of power, they have things are so much hidden by them, for them. You have to see what happens to these people afterwards.
(2:34)

We see it now with Netanyahu, the Israeli leader, or ex-Prime Minister. The way this guy was getting, energy by hate, by creating hatred, lies, and what you call, deception. What did this guy get from, by deception? Just feeling he can do. It's something interesting because it has come in negotiation in some documentation.

If you remember 4 or 5 years through our connections in American security we approached Netanyahu, for peace talks with Iran, to start a dialog. He waited a week and few more days, and he said, I will negotiate with anyone but Keshe, because he'll get his way. Then we realized why, he has used KF reactors in his designs to promote Iran has a nuclear power. That's why he cannot talk to Keshe, because he has used his space reactors by lying and cheating, as being a nuclear bomb Iran is developing. He openly has presented it. I have shown this picture before. He cannot sit on the same table and negotiate with us, when he has used us to create so much fear and pain to millions of people in Iran, and all the hatreds we see.

I have shown this before .. when I go through the archives, (2:36). of the pictures, why this man has such a behavior. Why has he used the KF reactors in presenting to the WL as a nuclear weapon. And he ?? and some of the actions of world governments against Iran, is actually the design of our nuclear reactors, space T. How evil this guy has been. He cannot look in your eye and negotiate with you, when he has used your T, your reactor to fool the others, into accepting that the nation is developing a nuclear bomb. It's unbelievable. These people at a point of power, they can do.

We are planning to take this into court in Israel against Netanyahu, deception, and being at the time, in a point of power, and having absolutely an idiot in the White House as a president, or in a way, collaboration between the two. This has become a point of sanctions. Why do people at the point of power do such a thing. No wonder he won't negotiate with us, because he has used the KF space reactors in the same picture and he has made it to be, (2:38). a nuclear bomb. 90% of the fear in present negotiations, it is in our .. communication with the 5+1. How come the Americans have accepted this foolishness. It's exactly the same pictures from our teaching, has been used by a WL to bring sanctions on a nation, which does have no intentions of developing a nuclear weapon.

Now even our own leaders in Iran were aware of how we got to this point. You as KS work with reactors, we worked together to create a condition of peace to show the T and a twisted minded, what I call, demented fear driven guy, has used our T. It's literally, I went through when I saw these pictures, in the same emotion as the Nobel, when we got the Nobel Prize. When he saw, what really was about him, but what he brought to me, how my T, how a reactor, which I developed to bring peace for humanity, has been used by 2 WL, most demented leaders we've ever known, and it has become a cause of sanctions on Iran. (2:40).

It's absolutely, we cannot go back. We cannot go back. We cannot change how our reactors are used. Our work, as us as KS, is used. This just came to me from Azar. Rick play it, and see we Are KS and how we abused. ... We are trying to explain to the

Americans that this picture .. is part of Iran space T. ... Look at it the both pictures are part of our teaching. ... There is a copyright on it, it belongs to BBC. .. We are going to be brought down by BBC. ... Don't play it. (2:42).

IAEA has a problem with this picture, because it's on the table nobody can deny it anymore. Biden has a problem with this picture, because his team has to go back and say, Trump had trumped the whole nation. This is part of our problem. If you see it, than you understand how difficult the job is for KF. We worked on trying to bring a peace program, we developed a space program, and just look at the picture. A WL lying in public to bring crimes, and bombing and killing, by cheating. You all know this reactor, it's a copy of the Iranian space reactor. (2:44). This picture as part of the video which shows Israel . brings shame on the flag and the nation.

Your space reactor, and just look the way they show inside it. I think some of you did the test, we've shown this structure, we've opened this reactor. They are using our T in a way, to create a condition of fear. And they call it, "designing a nuclear weapons." "Designing of Iranian, .. dissemination." If you go back and look at the.. some of you KS as working in the lab have seen it. This is the reactor. You see it. My knowledge to bring peace has been used by the most heinous man 2 WL, to bring sanctions and killing and dying of children in Iran.

This is why we take the love of God from the nation of, not the nation, from the tribe of Moses. When you look at these, and when I see it , as the inventor, developer, and I see what I brought, and the purpose, and what has been made to be, and brought sanctions, and has brought hundreds of thousands of people suffering, (2:46). with the lying and cheating of these people. And the beautiful thing about it is, the Belgium's have passed this to the Iranians, to say I am an Israelis terrorist. They all lived within my home, and sabotaged everything from inside, lies and cheats. All work together to bring the most beautiful T, to be the most heinous. Lining their bank accounts and men in their bed. Now you understand when I say, I am in ashamed to be in the clothes of man.

It is not easy when you face these things and you have to fight to overcome a lie. (2:48). To fight, to show how proud these people are to be part of this. That these people have brought to us. Are you there Rick .. But in reality it's for us, it's a shame to see our T, as been put it.

This has brought a big pressure on IAEA. This picture and the picture of the KF space reactors in past week, has brought mayhem in IAEA. They do no know how to handle this. How to work with this. How can they go back and tell nations, we accepted a lie. So IAEA is doing its best to cover-up this. (2:50). And the Americans are running rats from it. This picture, is the picture of a murderer, a terrorist, and most evil man I could ever known to exist in the time of my life. Where you deliberately go out to do such a damage. Tomorrow morning in negotiations, these things have to be solved. Americans don't know how to handle it. The Americans, the Biden organization doesn't know how to explain this to the world, that they have been cheated. IAEA is trying to distance itself as far as it can, from this position.

And what can we do? We teach the T as messengers of peace, for you to learn how to go to space. And we get the most evil men on this planet, 2 of them. Then celebrating, if you go further on this video you see the 2 devils, what you call Satan's hugging each other under the American flag. We lied, we cheated, how do we share the loot, by selling weapons to the Arabs. (2:52).

This is where we have the problem, this is where we find pain in the T, .. I cannot find words to describe it, to explain it, but how do we, how do we explain this to our people. How can we explain this to people, that a tool for elevation of the man, for science and T, has been used the wrong way. And deliberately, and they are celebrating doing it. (2:54). Any other question.

Q: Kay ... God bless ... all the energy you put in this negotiation ... and hopefully by the grace of God, sees it goes in the direction you are wishing ... Those leaders, those countries who are superior, is there any way we could take that superiority away from them, that they don't feel the arrogance?

K- Elevate their soul, elevate their soul.

Q: Apart from that, is there a quicker way.

K- When we say we take the love of God from a tribe, (2:56). it means we give it to them, but their soul will not accept. It's not punishment by us, it is punishment by themselves, to themselves. We don't punish. When we say we take the love of God, it means we give, but they cannot receive it, because they punish themselves, they block receiving. It is the way these WL don't understand, until they come to the point themselves to be.

We used to have close friends from Iraq, and at a very high level, before, when Saddam was in position of power. And the things they used to tell us, is that people used to have weddings in hiding, from the fear of Saddam and his sons, what they used to do, come and take the brides on their wedding. They used to hide their brides in rooms and basements from these evil people, not to get to. Where there was a point of celebration.

Then we saw what happened to Saddam. He himself hid underground, what he did to other people came to himself. They live that cycle. How long do they hide under that ground, for every step which goes over for them, I might be found out. We've seen this again and again. (2:58).

You see, we can't do much, but they do it to themselves. Where is the reality, and what do WL do with themselves, is another point, after they do these kind of things.

What we see in the next couple of generations there will be no sign anyone, who will follow Moses. A couple of more generations. Because they become enlightened to the truth, and the way their leaders, and the way they were setup. In a way, people used to hide to call themselves (Jews), this time openly they walk away from it. The same will come to Vatican and will come with the others, where the people see the truth about how, and what reality is. By the end of this century there will be no Jews left. Not by

elimination, but by choice not to be. The name of Judaism will be on the paper, and soon will come off the paper. We don't say the end of a state, we call the elevation of the soul of those who understand it, they'll walk away from it, how long .. How does every Israeli feels when they know he is such a cheat and ?? these pictures by the leader, children are dying in Iran with sanctions. (3:00). This is the way they make their own people to walk away from their own belief.

Q: my wish is .. for what you just talked about earlier, about Netanyahu and Trump, going on about the lie of the century. I wish that comes into light as soon as possible.

K- It is in the light. It's on the documentation to IAEA, and it's on the table of 5plus1, this picture.

Q: I hope it will be in the mass media.

K- No they won't allow it to come out. It's on BBC, it can't be more mass media than BBC. You understand. But connecting it to where it comes from .. IAEA. This morning, during these teachings today, I had communications with IAEA in the background. They don't know what to do, they say, "we leave it, we can't do anything with it." This is during the teaching of this morning. IAEA offices are in the shock, because they supported it.

Q: .. we've been there before, not so far distant past. .. They cooked up all that rubbish about the weapons of mass destruction of the Iraqis, and 45 minutes to London. They went in there, killed a few millions, and they said, "oops there was a flaw in our intelligence." (3:02). They can simply do that if they want to. The point is, it is really not there. The UN was involved in that occupation, and destruction of a nation. Nonsense they built up, just exactly like Trump and Netanyahu, built up about KF reactor, which is supposed to be the most important piece of T in the history of mankind. They can easily revert everything back if they want to, and bring into the open. And say, "oops we made a mistake, somebody told a lie." And they always have a sacrificial lamb. They wouldn't care about Netanyahu and Trump.

K- You know what the Americans are doing. Oh, this is part of it, this was not all of it. You understand.

K- You know, if you are in Vienna, we go to the conference. The conference is like on one side, and in front of you is like a camp of, tent of reporters, flashing and doing. These reporters are told what they can record, what they can serve back to their headquarters to show.

We have the Iranian channel, everyday you go they are there. It's the usual what do you call, celebrity show. They go on lunch, they go on lunch, they come back, they come back. They are there, just only to wind it, that it has something. How can we put this. Even our own Iranian television channels are not prepared to bring it out in Iran.

Q: Shame on them. (3:04).

K- This is .. (Mr. Keshe cries a little) When you go to this conference, it's like a cat show. You know the cat walk? That's all it is. The American negotiating team has sent 2 or 3 to Vienna, they're staff is sitting in London. When we can bring the Iranians on their knees, then we fly.

K- Somebody says, (in the chat) tell them to visit the KF Exhibition center atomic energy in person so they can have a good laugh. We already done that. We have prepared that.

They are fully aware of the what do you call it, the structure. Thanks to the KF team in .. Austria, in Linz. We have made everything prepared ready, for the visit with IAEA.

They've come, we've been told they have come at night, and they have visited the center in secrecy. It's very interesting. We had the report that while the (first) EC in Linz was closed down (due to Corona), the Americans and the European scientists have been allowed to go in, (3:06). and investigate our T. You've been to the EC yourself, you came for the opening. This is today. The exhibition is set completely to show the diversity in T. They have been there, like thieves at night.

Q: Not that they would understand anything.

K- We have KS who work with them.

Q: I am sure they don't understand anything.

K- Ashamedly we have KS who work with them.

Q: A lot of shifting, everything has gone to the basement.

K- Yes, now downstairs has become the space T, done this week. Thanks to team in Linz, we are in Vienna.

Q: .. can I say something. I want to continue with the first statement I made, all bunkers it may sound. But to take away the superiority appears to me, to those arrogant nations, is to take their advanced T away from them. Delete them somehow. It sounds out of this world, but I am sure there is a way we could mute those very tools that they have, that gives them the superiority. Once they don't exist, they will become humble.

K- Didn't it happen to us, as the Persian Empire? And now, (3:08). we become humble, and they see it as a weakness. This is the problem. By that time, I am sure when we had the Persian Empire, and before the empire became an empire, our leaders did the same to the other nations. It wasn't that everybody came, and became part of, there must have been atrocities.

Q: Yes there have been,

K- So have we matured for 300 years not crossing our borders. How long do we have to wait for them to mature?

Q: We need a catalyst, I don't know how.

K- The catalyst is the new T. But the time for it, starts from next Tuesday.

Q: We wish from our soul.

K- We know from our soul.

Everything is under the control of what we call, "incompetent people" who reached to the point. In the beauty of it is, whatever man needs to survive in the space, from this planet, is under this roof. If you understand it. In a way, for the first time, if you open the picture ... you see, (3:10). the first time we showed the Horizontal system in public. In this machine I can grow your leg, I can change your heart. Next to it you see the Brain system, next to it you see the Vertical S, .. original EU for dense plasmas. It's beautiful to see, how the man has strived for thousands of years, is gather under one roof. If you look just above it, you see the reactor, space reactor in the center, the one which Netanyahu has used.

Any other question.

Q: Azar, why don't you put the negotiators , (3:12). in the EU before they sit for negotiations, like when you go to the airport they send you through this scanner unit, check you.

K- Check their brain for the souls.

R: yeah, maybe they need to check their brain at the door and just negotiate with their souls instead

K- I don't know, years ago, I used to work for IAEA and we used work in a cow shed. The way we used to enter and exit, in a way was very funny, the way you went to work in a farm. It was so strange that a few times ... the Russians have cameras hidden in the trees, watching who comes and goes in the center. The joke was even some of the cows have a camera in different positions in their bodies, that they can see people going out in the fields talking. Because we were told when there was something very confidential you always don't speak in the building where others can hear you. So very confidential things was talked in the garden, you could see a lot of people walking 2 together. It was a strange way.

At the moment, IAEA has literally been snookered, with what is on the table of negotiations and why the sanctions on Iran. Once you create doubt in one position, and you can strengthen it, (3:14). then doubt comes on the rest of it. This is part of KF, job not to create a doubt, but show the fact. At the moment IAEA chiefs in Vienna, are literally running like rats, how to bring a country who is supposed to be developing nuclear weapons, is a space T, is used by nations, to put sanctions on it. IAEA, Mr. Grossi at the moment is on the run with this. He's got to answer to Iran, why has he supported, why has IAEA has supported sanctions when they had no proof, and relies on the lie of 2 presidents. One of our negotiators said something nice. What Russian girl get to bed with Trump to get him to do this. This is a massive, massive problem today, sits for IAEA, who has supported nuclear sanctions, where lies have been placed. They do not know how to handle it. (3:16). They literally do not know how to handle this situation.

R: .. It seems like in a way, greatest blessing .. Netanyahu .. I have seen that years ago, I start laughing at his reports.

because is brings it to the surface, they'll have to deal with it. .

K- We have a big problem .. this lie, this presentation lie... The biggest problem now in the negotiation, is not the negotiation prior to 2015. It's the new sanctions which is brought, because of this picture, this video by Netanyahu to Trump. This is the biggest problem. This is the biggest problem for us. (3:18). With this picture, with this document on the table all the sanctions are irrelevant, but the Americans don't want to accept.

In a way, I will read you part of the text of this, it's very interesting that, we put it in a very polite way. It says, "now who has fooled who? Iran's new advanced nuclear space T, has become weapon of, weapon T, by misrepresentation and deception." And the

Americans, to confirm they have been deceived, they have a big problem to sell it to their nation. Iran's new advanced nuclear plasma T is a space program development. The system developed is to allow man to travel in the deep space, to produce any material as he needs in the space, without returning to earth for supply.

How do we .. the biggest problem is Americans confirming that they have been deceived. (3:20). Americans confirming they have been deceived. A nation this big with their president, to confirm that they have been deceived, brings question mark on other decisions they have made.

At the moment in IAEA we are in negotiation, break point, with this documentation. Because this makes the sanctions absolutely ridiculous. I am back in this afternoon, or hopefully tomorrow morning. We want this to be opened up. The American have to answer why they placed the sanctions on a lie. Why didn't they prove, how they did not check their .. sanction policy.

It's amazing, now you know as KS, how you sit in the center of negotiations. How you.. This is the fear they have, that the KF, and everything goes public. Now you can see, how our T and KS, people like Armand and the others, who came to the Inzano, they brought their reactors, they built it themselves, your reactors now, is used as a weapons T for the nations who abuse. The lack of knowledge by the others, about the work of the KF. (3:22). I see myself responsible for every suffering in Iran, when my T has been used this way, sanctions added to, then I am ashamed to have another person who lived with me, sending it to tell them, the way it's done, by lies and deception. When you mislead, when you are there, when you are, it's part of the life, this deception, whatever has been said, done, then is given back to. I'll show you something very interesting ... they are proud to show how they have spied, and they have delivered documents as lies, to other nations. how they lied to it. The fact is, how alert do we become, our T to be misrepresented.

You see there is a difference between us and them. This is us as joint, as KS, American KS. And this as us as KS in another continent. (3:24). And this is them using the same knowledge. We promote peace through the same knowledge. They used our knowledge to create sanctions and pain.

Any other question (3:26).

Let's see what comes up and how we succeed in these works.

R: When you are confronted with lemon, you find a way to make lemonade ...

K- We'll see what we can do, .. have to do, .. how we can shape the future, the correct way.

.. hopefully we'll find another way to enlighten, ?? for next time, or next generation.

Proofed to here ..

411 KSW Dec 16 , 2021 (3:28).
